

LGED

Local Government Engineering Department

TRAINING CALENDAR 2010-2011

TRAINING CALENDAR 2010-2011

PREFACE

LGED would continue to remain professionally competent, efficient and effective public sector agency for performing the inter-related and complementary functions of developing, maintaining and managing transport, trading and small scale water resources infrastructure at the local level by ensuring Local Government Institution and community participation and taking care of environmental and social issues.

Providing technical and institutional support to strengthen the local government institutions and serving local communities and other stakeholders. It would also develop and manage the local infrastructure for increasing farm/non-farm production, generating employment, improving socio-economic condition, promoting local governance, reducing poverty and acting as agent of change at the local level.

Md. Wahidur Rahman

Chief Engineer

Local Government Engineering Department

Training in LGED

Training is a systematic process to develop knowledge, skill and attitude to attain the goal of the organization. There is no alternative of training in orienting people with modern and latest technology. It is the oldest art and newest science. Normally people acquire knowledge in a particular discipline and enter into services. Job field can't be addressed adequately with the academic knowledge gained from formal educational institutes. People always need additional orientation or training to be fully acquainted with a job concerned. Technology is developing fast. Concerned People need to cope up with the latest technology. Training is the only tool that enables people to cope up with latest technology.

As an organization LGED always emphasizes on training. Training in LGED started since 1982 under former Works Program Wing. A Central Training Unit (CTU) at LGED Head Quarter Dhaka and 10 Regional Training Centers was set-up under LGED in 1998. LGED Training system is decentralized. 64 districts and 482 upazilas are covered through 10 Regional Training Centers. It does not mean that training programs are arranged only at HQ and regional levels. Trainings are also held at district, upazila and union levels depending on the target group and the types of training. All the categories of employees, LGI representatives, contractors and Project beneficiaries are covered under training program. Effectiveness of training is measured after certain interval by external agent. Training is funded from development projects as well as from GOB revenue budget.

The overall objectives of LGED Training Unit are to develop capacity of LGED Officials and staff through development of overall training policy, assessment of training need and preparation of annual training plan, development of training modules, implementation and evaluation of training courses. LGED Training Unit develops in-house trainers through Training of Trainers (TOT) course.

During the last two decades, LGED has expanded a lot. Also the image of LGED has been upgraded at national and international level. Training is one of the important factors behind these. A Training Calendar is prepared by CTU, LGED at the beginning of each fiscal year for smooth implementation of training courses funded from GOB and different donors. It is expected that the

training calendar showing course name, venue, period and duration, category of participants as well as funding sources will help a lot to harmonize implementation of training in LGED.
