Land Acquisition and Involuntary Resettlement Due Diligence Report

Document stage: Draft for consultation

Project number: 49329-006

June 2019

BAN: Second City Region Development Project – Dhaka Region Roads (Savar Upazila)

Package No. CRDP-II/LGED/DHAKA/SAVAR/NCB/2018/W-04

Prepared by the Local Government Engineering Department, Government of Bangladesh for the Asian Development Bank.

This draft land acquisition and involuntary resettlement due diligence report is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, management, or staff, and may be preliminary in nature. Your attention is directed to the "terms of use" section of this website.

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

SPS - Safeguard Policy Statement

I. INTRODUCTION

A. Background

- The Second City Region Development Project (the project or Second CRDP) will support 1. development in the city regions of Dhaka and Khulna by building upon infrastructure and capacity building initiatives implemented during the first City Region Development Project (CRDP) funded by the Asian Development Bank (ADB). The project will finance crucial infrastructure in urban and peri-urban areas needed to stimulate growth and improve livability in Dhaka and Khulna, two densely populated rapidly growing city regions of Bangladesh. The project will also strengthen capacity for project development, sustainable service delivery, and community awareness. The project will be implemented over a five-year period. The Dhaka Region Roads (Savar Upazila) subprojects were selected for development under the Second CRDP during the pre-feasibility study conducted by the Project Preparation Technical Assistance (PPTA) consultants appointed by ADB. A preliminary social safeguard screening was also conducted for the proposed schemes combining roads and drainage components. Local Government Engineering Department (LGED) is the Executing Agency of the project. The concerned Upazila Engineer's office, in this case the office of the Savar Upazila Engineer of LGED will be the implementing agency with a project implementation unit (PIU) within its structure.
- 2. Under package W-04 of the Dhaka Region Roads (Savar Upazila) subproject, four roads, namely a) Balivadhra GC Dhamshona UP Simulia UP Road (Ch. 770-6180 m) (Road ID # 326723025), b) Nabinagar Kaliakoir RHD Kaichabari Road (Ch. 460-2122m) (Road ID # 326724288), c) Polashbari Kaichabari Dogortoli Road (Ch.0-3950m) (Road ID # 326724096) including 493m link Road and d) Ghorapir High School Bashbari Primary School Road (Ch.0-1772m) (Road ID # 326724047) are identified and will have the following components: improvement of the road surfaces, improvement/ construction of drains, and ancillary facilities like cross drainages, culverts, walkways and slope protection works. Such works will improve the Upazila transport and drainage system and will also prevent water logging problem and flooding during monsoon. All improvements will be constructed within the existing vacant road width (right-of-way) of the road. The road is under the ownership of LGED according to the Gazette published by the Government of Bangladesh, dated 23 October 2017. The location of the subproject is shown in Figure 1.
- 3. The Resettlement Framework adopted for the project outlines the objectives, policy principles and procedures for land acquisition, if any, compensation and other assistance measures for displaced/ affected persons,¹ if any. The Resettlement Framework is prepared based on GOB's Acquisition and Requisition of Immovable Property Act, 2017 and ADB's Safeguard Policy Statement (SPS), 2009.

B. Scope of this Report

4. This draft land acquisition and resettlement due diligence report is prepared for the Savar Road and Drainage subproject Package W-04 roads and is based on preliminary design.

In the context of involuntary resettlement, displaced/ affected persons are those who are physically displaced (relocation, loss of residential land, or loss of shelter) and/or economically displaced (loss of land, assets, access to assets, income sources, or means of livelihoods) as a result of (i) involuntary acquisition of land, or (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas. It covers them whether such losses and involuntary restrictions are full or partial, permanent or temporary.

The preliminary design of the proposed subproject is described in detail in Section III (Subproject Description).

- 5. A due diligence process was conducted to examine the land acquisition and resettlement issues in detail, in line with ADB SPS 2009. This report describes the findings and provides copies of relevant documents, resolutions, minutes of meetings, drawings and photographs. This land acquisition and resettlement due diligence report needs to be read along with the Resettlement Framework prepared for the Second CRDP.
- 6. During project implementation, the Project Management and Coordination Unit (PMCU) will review this draft due diligence report; prepare a confirmation letter or report documenting any modifications to the subproject and submit to ADB; and receive a 'no objection' confirmation from ADB prior to contract award under the subproject.

	•		
SI.	Name & ID of the roads	Length (km)	Major Components
1	Balivadhra GC - Dhamshona UP - Simulia UP Road (Ch. 770-6180m) (Road ID # 326723025)	5.410 km	Road carriageway, drainage, sidewalks, culverts, slope protection works
2	Nabinagar - Kaliakoir RHD - Kaichabari Road (Ch. 460-2122m) (Road ID # 326724288)	1.662 km	Road carriageway, sidewalks, culverts
3	Polashbari - Kaichabari - Dogortoli Road (Ch.0-3950m) (Road ID # 326724096) including 493m link Road	4.443 km (Road: 3.950km+ Link road: 0.493 km)	Road carriageway, sidewalks, culverts
4	Ghorapir High School - Bashbari Primary School Road (Ch.0-1772m) (Road ID #	1.772 km	Road carriageway

Table 1: List of Roads and Components under Savar Package W-04 Subproject

II. POLICY FRAMEWORK AND ENTITLEMENTS

7. The Resettlement Framework prepared for the Second CRDP sets out the objectives, principles, eligibility criteria and entitlements for affected persons, if any, based on ADB SPS, 2009 and the Acquisition and Requisition of Immovable Property Act, 2017 of Bangladesh. Details of policies are described in the Resettlement Framework for the project.

III. SUBPROJECT DESCRIPTION

8. **Project area.** The subproject is located along Dhaka-Aricha National Highway about 25 km northwest of Dhaka City. Although the area is predominantly agricultural, and its developments were along the river Bongshi, but after construction of Dhaka-Aricha Highway its development shifted along the highway; currently, national level institutions, small and large garment and textile industries, pharmaceutical industries etc., are located in the subproject area.

A. Present Status of the Subproject

1. Road-1: Balivadhra GC - Dhamshona UP - Simulia UP Road (Ch. 770-6180 m) (Road ID # 326723025)

- 9. A segment of 5.410 km (from Chainage 0.770 km to 6.180 km) of this 6.18 km long road has been proposed for improvement works as one of the 1st priority readiness road subproject of selected Link Road, starts at Balivadra Jame Mosque and ends near Shimulia UP office.
- 10. The existing vacant road width is varying in between 7.30m to 9.80m and the existing carriageway width is varying in between 3.30m to 4.70m (Table 2). The existing road surfaces are of Bituminous Carpeting (BC), Reinforced Cement Concrete (RCC), Cement Concrete (CC) block and some portion is earthen. There is a 66m long bridge at chainage 4365. The existing road pavement including the non-metal portion needs to be improved at various sections that have suffered wear and tear with cracks, pot-holes, broken edges and depressions. There is no functional roadside drain along the alignment of the subproject road. There are three pipe culverts, one box culvert and one cross drain at different locations of the entire road length.

Figure 2: Photograph of existing condition of Balivadhra GC – Dhamshona UP – Simulia UP Road (Road ID: 326723025)

Condition of road at chainage 1380

- 2. Road-2: Nabinagar Kaliakoir RHD Kaichabari Road (Ch. 460-2122 m) (Road ID # 326724288)
- 12. A segment of 1.662 km road (Chainage 0.460 km to 2.122 km) have been proposed for improvement out of 2.122 km long road as one of the 1st priority readiness road subproject of selected Link Road, starts at Samvar CNG filling station and ends at Kaichabari Batuntake more.
- 13. The existing vacant road width is varying in between 6.50m to 8.70m and the existing carriageway width is 3.00 m (Table 2). The subproject road surface varies in type, made of BC and RCC. However, the existing road pavement including the needs to be improved at sections that have suffered wear and tear with cracks, pot-holes, broken edges and depressions. There is no functional roadside drain along the alignment of the subproject road. There is a box culvert at chainage 925 m which is in poor condition. A photograph of the subproject road is displayed below.

Figure 3: Photograph of existing condition of Nabinagar - Kaliakoir RHD - Kaichabari Road (Road ID: 326724288)

Condition of existing BC road 1110

3. Road-3: Polashbari - Kaichabari - Dogortoli Road (Ch.0-3950m) (Road ID # 326724096) including 493m link Road

- 14. This subproject is 4.443 km long adding 493m link road with the 3.950 km long road, one of the 1st priority readiness road subproject of selected Link Road, starts at Amin Plaza of Polashbari and end-up at Dargatoli Jame Mosque.
- 15. The existing vacant road width is varying between 5.50m to 11.60m and existing carriageway width is varying between 3.00m to 4.70m. The subproject road surface varies in type, such as BC, herring bone bond (HBB) and earthen road surfaces. However, the existing road pavement including the needs to be improved at sections that have suffered wear and tear with cracks pot-holes, broken edges and depressions.
- 16. There are four functional U-Drains of different sizes at different sections along the alignment of the subproject road. There is one Pipe Culvert at Ch. 1260m and one Box Culvert at Ch. 3820 which are in good condition. A photograph of the subproject road is displayed below.

Road condition at chainage 960

4. Road-4: Ghorapir High School - Bashbari Primary School Road (Ch.0-1772 m) (Road ID # 326724047)

- 17. This subproject is 1.772 km long, one of the 1st priority readiness road subproject of selected Link Road, starts near Gorapir Mazar and ends at Tin Rastar More.
- 18. The existing vacant road width varying between 6.20m to 8.40m and existing carriageway width is 3.00m all along the road. The subproject road surface varies in type, for example, BC, HBB and earthen. However, the existing road pavement needs to be improved at sections that have suffered wear and tear with cracks pot-holes, broken edges and depressions.
- 19. There are two functional U-Drains and one Box Culvert at chainages 245 m, 575 m and 1,155 m respectively.
- 20. A photograph of the subproject road is displayed below. Google Earth image & photos at congested/dense stretches with commercial development of the subproject roads are presented

in Appendix 1.

0+690 – 1+772	6.20 - 8.40 (1+410) (1+490)	5.50	3.00	3.00

^{*} Proposed carriageway widths are the minimum/standard widths of carriageways, however, may be wider at intersections and turnings as they exist, but will never exceed vacant road widths.

B. Proposed Subproject

- Road-1: Balivadhra GC Dhamshona UP Simulia UP Road (Ch. 770-6180 m) (Road ID # 326723025)
- 21. The existing road is to be improved on the existing alignment and within vacant road widths. A cross section of the road according to the preliminary design is displayed in Figure 6.
- 22. There will be BC, RCC and CC Block carriageway, the proposed carriageway width is varying, 3.70 m 5.50 m according to design, on the side/ sides of the carriageway there will be hard shoulder/ shoulders or walkway/ walkways and soft shoulders depending on the availability of vacant road width. The side slope of road embankment will be of 1:1.5. There will be 8 box culverts at several places.
 - 2. Road-2: Nabinagar Kaliakoir RHD Kaichabari Road (Ch. 460-2122 m) (Road ID # 326724288)
- 23. The existing road is to be improved on the existing alignment and within vacant road widths. A cross section of the road according to the preliminary design is displayed in Figure 7.
- 24. There will be BC and RCC carriageway, the proposed carriageway width is varying, 3.00m 3.70m according to design, on the side/ sides of the carriageway there will be hard shoulder/ shoulders or walkway/ walkways and soft shoulders depending on the availability of clear road width. The side slope of road embankment will be of 1:1.5. There will be a box culvert at chainage 925.
 - 3. Road-3: Polashbari Kaichabari Dogortoli Road (Ch.0-3950 m) (Road ID # 326724096) including 493 m link Road
- 25. The existing road is to be improved on the existing alignment and within vacant road widths. A cross section of the road according to the preliminary design is displayed in Figure 8.
- 26. There will be BC, CC block and RCC carriageway, the proposed carriageway width is 3.00m 5.50m according to design, on the side/ sides of the carriageway there will be hard shoulder/ shoulders or walkway/ walkways and soft shoulders depending on the availability of clear road width. The side slope of road embankment will be of 1:1.5. There will be 4 box culverts at chainage 1260, 3420, 3570 and 3620.
 - 4. Road-4: Ghorapir High School Bashbari Primary School Road (Ch.0-1772 m) (Road ID # 326724047)
- 27. The existing road is to be improved on the existing alignment and within vacant road widths. A cross section of the road according to the preliminary design is displayed in Figure 9.
- 28. There will be 3.00 m wide BC carriageway all through the road according to design, on the side/ sides of the carriageway there will be soft shoulders depending on the availability of vacant road width. The side slope of road embankment will be of 1:1. There will be a Box Culvert at chainage 410 m.

Figure 9: Cross section of Ghorapir High School – Bashbari Primary School Road (Road ID:326724047)

IV. FIELD WORK AND PUBLIC CONSULTATION

A. Outline of Field Work

29. Intensive inspection of proposed subproject, alignment of the roads, available widths of the roads, conditions of road and its surroundings was undertaken during field visits, along with stakeholder consultations. The road under this subproject is owned by the Government/ LGED and there will be no requirement of land acquisition for this proposed subproject. Pages showing the road IDs (highlighted) owned by LGED under this subproject from a Gazette published by the Government of Bangladesh, dated 23 October 2017 are provided in Appendix 2.

B. Public Consultation

- 30. Consultations were undertaken with key stakeholders in line with ADB's requirements related to social safeguard and Involuntary Resettlement and comprehensive consultation program was carried out by the PDSC consultation team. The consultees included officials from Savar Upazila Engineer's office, residents and business owners living adjacent to and near the proposed sub-projects elected representatives and other community members and stakeholders within the area. The initial objective was to identify different issues, problems/constraints and responses of the community to the road sub project. The consultation included information dissemination about the Project/ Sub-project and its scope, possible positive and negative impacts, involvement of local people in different activities of the Project and possible employment in Project works, etc. The public consultation and participation process included (i) identifying affected stakeholders; (ii) information on the background and technical characteristics of the sub project; (iii) creating opportunities and mechanisms for the community to participate and raise their views with regard to the proposed development; (iv) giving the stakeholders feedback on findings and recommendations; and (v) ensuring compliance to process requirements with regards to environmental and related legislations.
- 31. In connection with this subproject the safeguard team of PDSC visited Savar Upazila on 25th of September 2018, and had an introductory meeting with the Upazila Engineer, Assistant Engineer, and some local councilors. Two field consultation meetings were then arranged by the Savar Upazila Engineer's office. Attendance included local public representatives and other stakeholders including community representatives, members of the community, local government representatives, and businesses and family living adjacent to the road. During these field visits, the consultants investigated the existing condition of the roads and drainage alignments, any resettlement needs, rehabilitation, and the grievance redress mechanism.
- 32. The two field meetings took place at the roadside. The total participants were 124 of which 58 were women. Details of these meeting: attendance sheets, meeting notes and photos are included in Appendix 3 and in Appendix 4. During site visits, Councilors', the Assistant Engineer, other Sub Assistant Engineers and a surveyor accompanied by the consultants to assist identifying the locations of the road alignments were in attendance.
- 33. During consultations and field visits, the community was informed that the road and drainage proposals would not require any land acquisition. The participants were also informed that there would be no tree cutting, relocation of business, and permanent removal of mobile vendors/hawkers. There is no possibility of any long-term adverse impact in terms of losing income or livelihood. Pedestrian safety would be taken care of by the contractors during the construction period by providing alternate roads, safety signs & boards, and providing speed breakers where required. Moreover, mitigation measures as specified in EMPs would also be

implemented by the contractors which would be closely supervised by the Upazila Engineer's officials and consultants. The participants were also informed that there may be local employment opportunities for skilled and unskilled laborers. The active participation of women was encouraged during the field visits.

34. During discussions, the local community expressed their worries about the poor condition of the present road and drainage facilities. The general conclusion of the community was that they supported the improvement of the road and drainage channel. Details of the consultation program is included in Appendix 3.

C. Consultations with shopkeepers who may be temporarily affected

35. Consultations were also undertaken with the shopkeepers who may be temporarily affected during construction of the roads. Their concerns are about dust, noise and access to the shops. They understand that the problem is temporary only and could be mitigated by adopting appropriate dust and noise prevention measures by the contractor during construction. Wooden planks or other walkways will also be provided to ensure continuous access to shops. The 'no objection' to temporary disruption due to construction works is attached in Appendix 5. Consultations were also undertaken with the shopkeepers who may be temporarily affected (65 shopkeepers) which is related to noise, movement of people, obstruction of drainage etc., during construction of the roads. Their concerns are about dust, noise and access to the shops and they are aware that these temporary disruptions, which may last for 3 days approximately. Because, they understand that the problem is temporary only and could be mitigated by adopting appropriate environmental management plan (EMP) by the contractor during construction. The EMP will include a provision requiring the contractor to conduct works in congested commercial stretches in non-business hours and prepare site specific impact avoidance and minimization plans. The EMP will take measures to minimizing excavation, avoiding disturbance to pedestrian movement through provision of planks for access, provision of adequate signage, careful traffic management and alternative temporary drainage systems. The work for the road could take place overnight and advance notices shall be given to the community where partial road closures are inevitable. Only partial road closures are anticipated. Works will be undertaken section by section so that traffic may continue to flow, and access disruptions are minimized. The public will also be informed about any alternate routes, if available. 'No objection' to temporary disruption is attached in Appendix 5, which is signed by all 65 shopkeepers without any coercion or objection. The updated DDR will include a third-party certification of the no objection.

V. LAND AVAILABILITY AND INVOLUNTARY RESETTLEMENT IMPACTS

A. Involuntary Resettlement

- 36. The social safeguard study for package W-04 of the Savar Upazila Road and Drainage subproject suggests that there is no need for land acquisition as development of roads and drainages will be done on the existing vacant land of the roads, land which belongs to government/ LGED. Pages showing the road IDs (highlighted) owned by LGED under this subproject from a Gazette published by the Government of Bangladesh, dated 23 October 2017 are provided in Appendix 2.
- 37. It was revealed through physical investigation that the subproject will not impact any private owned land for undertaking civil works. As such no land acquisition and resettlement will be required. There will also be no loss of livelihood, either permanent or temporary due to loss

of land/assets, whether titled or non-titled.

- 38. Though this subproject will unlikely cause any impact during construction, however, there may be minor temporary disturbances related to noise, and movement of people, obstruction of drainage etc. These disturbances could be easily addressed by mitigation measures, such as, minimizing excavation, avoiding disturbance to pedestrian movement through provision of planks for access, provision of adequate signage, careful traffic management and alternative temporary drainage systems. The work for the road could take place overnight and advance notices shall be given to the community where partial road closures are inevitable. Whenever inevitable, road closure will be done section by section only so that traffic may still flow. The public will also be informed about any alternate routes, if available. These measures shall be included in the Terms of References (TOR) of the Contactor.²
- 39. Summary of land acquisition and resettlement impacts which has been assessed using a standard involuntary resettlement checklist undertaking a complete transect walk for the subproject shown at Table 3.

Table 3: Proposed sub-project components in Savar Upazila Road and Drainage Subproject, package W-04 and their Involuntary Resettlement Impact status

Subproject, packa			y nesettiement impact status
	Length	Land	
Component	(km)	ownership	IR Impact
Balivadhra GC - Dhamshona UP - Simulia UP Road (Ch. 770-6180m) (Road ID # 326723025)	5.410 km	Government / LGED	Road and drain construction will be done on the existing available width of the roads. The land has been in possession of Government / LGED. There are no issues related to land acquisition or resettlement. 39 shopkeepers will be temporarily affected during construction.
Nabinagar - Kaliakoir RHD - Kaichabari Road (Ch. 460-2122m) (Road ID # 326724288)	1.662 km	Government / LGED	Road and drain construction will be done on the existing available width of the roads. The land has been in possession of Government / LGED. There are no issues related to land acquisition or resettlement.
Polashbari - Kaichabari - Dogortoli Road (Ch.0- 3950m) (Road ID # 326724096) including 493m link Road	4.443 km (Road: 3.950km+ Link road: 0.493 km)	Government / LGED	Road and drain construction will be done on the existing available width of the roads. The land has been in possession of Government / LGED. There are no issues related to land acquisition or resettlement. 26 shopkeepers will be temporarily affected during construction.
Ghorapir High School - Bashbari Primary School Road (Ch.0-1772m) (Road ID # 326724047)	1.772 km	Government / LGED	Road and drain construction will be done on the existing available width of the roads. The land has been in possession of Government / LGED. There are no issues related to land

² An 'Environmental Specification for Construction Contractor' delineating impact avoidance and mitigation measures and a 'Traffic Management Plan Template' delineating management of traffic and temporary road blockage during construction have been incorporated in Appendix 2 and in Appendix 3 of the IEE document of Savar Road and Drainage Subproject, package W-04.

	Length	Land

			acquisition or resettlement.

VI. CONCLUSIONS

A. Summary and Conclusions

- 40. A due diligence process was conducted for the subproject to examine the involuntary resettlement issues particularly with respect to the ADB SPS (2009) and GOB Land Acquisition Policy, 2017 requirements. The road and drainage construction/improvement subproject at Savar Upazila will be a straightforward construction/improvement along the existing alignments of the Government owned roads and within the vacant road widths. As a result, the subproject road and drainage improvement/construction will neither cross nor affect any private owned land or structures. Further, any disturbance will be limited to construction period only. The likely impacts are short-term, localized and could either be easily avoided or mitigated. The present report describes the findings of the study focused on the likely subproject impacts in terms of involuntary resettlement. The results of the study suggest that the subproject will not result in any land acquisition, resettlement or economic displacement. The reasons for this outcome are:
 - (i) improvement of the proposed roads and drainages will be done on the existing Government lands, which are also are encumbrance free; and
 - (ii) the economic activities of the population along the proposed subproject alignments will hardly be impeded by the excavation and constructions on existing road widths, so there should be no resulting losses in income or assets.
- 41. The subproject is unlikely to have any involuntary resettlement impacts, thus is classified as Category C. It does not require any resettlement survey and preparation of Resettlement Plan; nonetheless, extensive consultations/ discussions with the people and beneficiaries will be conducted and their participation will be ensured during subproject implementation to immediately address concerns, if any, to expedite project works. Safeguard compliance monitoring will be conducted during the project implementation and civil works activities.

B. Next Steps

- 42. The DDR needs to be updated with the following information:
 - (i) Continuous community consultations and stakeholder discussions are to be conducted at and around the subproject location. Issues discussed, concerns and suggestions of stakeholders to be taken into consideration during detailed design and implementation, will be included in the updated DDR;
 - (ii) The due diligence report will be updated based on the detailed design, initiation and completion of due procedures will be reported, and ADB approval for the DDR will be obtained prior to contract award; and
 - (iii) The updated DDR will include a third-party certification of the no objection to temporary disruption.

List of Consultations/Meetings at different locations of the subproject under Savar Upazila

	Data of			υραλιία 	
<u> </u>	Date of	Discourt	Number of	la acces	
SI.	Consultatio	Place of	Participant	Issues	Made of Constitution
No	n	consultation	S	Discussed	Major findings
01	25 September 18	Balivadhra GC – Dhamshona UP – Simulia UP Road (Road ID: 326723025)	Total 68 (male 32, female 36)	Purpose of the visit, information dissemination about the subproject, possible positive and negative impacts, necessity of land acquisition, compensation issues, local people's opinions,	During the consultation it was found that, all of the proposed component road and structures will be located within the LGED/government road. Private land acquisition is not required for proposed schemes. They are facing problems due to poor road condition, traffic congestion and water logging due to lack of culverts. They appreciated the roads and drains subproject, they expected that after improvement of road and drain the area will improve the traffic system and existing problem flooding situation of the area as well.
	25 September 18	Nabinagar - Kaliakoir RHD - Kaichabari Road, (Road ID: 326724288) & Polashbari - Kaichabari - Dogortoli Road, (Road ID: 326724096) & Ghorapir High School – Bashbari Primary School Road, (Road ID: 326724047)	Total 56 (male 34, female 22)	feedback on different social issues and concerns, grievances redress mechanism, participation of local people in different project activities, employment opportunity in project works etc.	All of the proposed component road and structures are found to be located within the LGED/government road. Private land acquisition is not required for proposed schemes. Shop-owners of a road may face some temporary disturbances during construction and they expressed their willingness to accept that. They are facing problems due to poor road surface condition, traffic congestion and water logging of the roads due to dense buildings at both sides of the road. They expected that after implementation of the road and drain subprojects the traffic and drainage problem of the area will be reduced.

No objection temporary disturbance by the shop owners who may be temporarily affected

স্থানীয় সরকার প্রকৌশল অধিদপ্তর

নগর অঞ্চল উন্নয়ন প্রকল্প (২য় পর্যায়) লেবেল-৪, আর ডি ই সি ভবন, আগারগাঁও শের-এ-বাংলা নগর ঢাকা-১২০৭

অদ্য ২৫ -/ ২০২ - / - ইং তারিখে সড়কের নাম - ইন্সিট্রে প্রেম্ম ০লি পর ইন্সিটের ইন্সিটিন ক্রিম্নিশি নির্মান কার্যক্রমে ব্যবসা বানিজ্যে সাময়িক অসুবিধা সম্পর্কে এক আলোচনা সভা অনুষ্ঠিত হয়।

আমরা অবহিত আছি যে রাস্তা পুনঃনির্মানের সময় ব্যবসা বানিজ্যে সাময়িক অসুবিধা হতে পারে। আমরা বলতে চাই যে, উন্নত রাস্তা আমাদের সবার জন্য প্রয়োজন। সাময়িক অসুবিধা হইলেও যোগাযোগ ব্যবস্থা ভালো হলে বিক্রি বেশী হবে তখন লাভ বেশী হবে। আমরা সেচ্ছায় নির্মান করার সময় ঠিকাদার তার কর্মীদেরকে সহযোগিতা করবো। আমাদের সম্মুখে এই রাস্তা উন্নয়নের কাজের প্রতি কোন আপস্তি থাকবে না।

No objection for temporary disruption

We are well aware about the temporary disruption of business/access during construction of road. Temporary disruption during construction for few days is acceptable as the economic benefit will be doubled after construction. We would like to express that all of us require an improved road and are willing to cooperate with the contractor during period of construction.

We don't have any objection for the road improvement work for the temporary disruption of business/access.
