Glossary

“Census” is a complete count of the population affected by a project activity including collation of demographic and property information. This will identify and determine the number of Project Affected Persons (PAP) and the nature and levels of impact.

“Cut-off date” is the date by which PAPs and their affected assets, as relevant, have been identified and new entrants to the site cannot make claims to compensation or resettlement assistance. Persons whose ownership, use of occupancy prior to the cut-off date can be demonstrated remain eligible for assistance, regardless of their identification in the census.

“Involuntary resettlement” Involuntary Resettlement refers to two distinct but related processes. Displacement is a process by which development projects cause people to lose land or other assets, or access to resources. This may result in physical dislocation, loss of income, or other adverse impacts. Resettlement or rehabilitation is a process by which those adversely affected are assisted in their efforts to improve, or at least to restore, their incomes and living standards.

“Land acquisition” refers to all methods of obtaining land for project purposes, which may include outright purchase, expropriation of property and acquisition of access rights, such as easements or rights of way. Land acquisition may also include: (a) acquisition of unoccupied or unutilized land whether or not the landholder relies upon such land for income or livelihood purposes; (b) repossession of public land that is used or occupied by individuals or households; and (c) project impacts that result in land being submerged or otherwise rendered unusable or inaccessible.

“Livelihood” refers to the full range of means that individuals, families and communities utilize to make a living, such as wage-based income, agriculture, fishing, foraging, other natural resource- based livelihoods, petty trade and bartering.

“Project affected persons” (PAPs) means persons who are impacted by involuntary resettlement as defined below.

Replacement Cost refers to a type of compensation given to those who are being displaced from their land or homes. The replacement cost is an amount assessed for the affected properties which is sufficient to purchase alternative land or asset in an open market plus all transaction costs involved in receiving compensation and replacement of lost assets.

“Resettlement Action Plan (RAP)” is a resettlement instrument (document) to be prepared when subproject locations are identified. RAPs contain specific and legally binding requirements to be abided by to resettle and compensate the affected party before implementation of the project activities causing adverse impacts

“Resettlement Assistance” means the measures to ensure that project affected persons who may require to be physically relocated are provided with assistance such as moving allowances, residential housing or rentals whichever is feasible and as required, for ease of resettlement during relocation.

“Security of tenure” means that resettled individuals or communities are resettled to a site that they can legally occupy, where they are protected from the risk of eviction and where the

tenure rights provided to them are socially and culturally appropriate. In no event will resettled persons be provided tenure rights that are in effect weaker than the rights they had to the land or assets from which they have been displaced.

Informed consent means the people involved are fully knowledgeable about the project and its implications and consequences and freely agree to participate in the project Power of choice refers to the people involved have option to agree or disagree, without adverse consequences imposed formally or informally by others.

Executive Summary

Introduction

The Government of Bangladesh (GoB) through the Ministry of Finance (MoF) is implementation of the Western Economic Corridor and Regional Enhancement Program (WeCARE Program) with the Roads and Highways Department (RHD) and the Local Government Engineering Department (LGED) as the main implementing agencies with the support from the World Bank (WB). This program is planned to be implemented in three phases over 10 years in 10 districts including Jashore, Jhenaidah, Magura, Chaudanga, Satkhira, Natore, Sirajganj, Kushtia, Pabna and Meherpur. The anticipated time for phase-1 is five years for four districts Jashore, Jhenaidah, Magura, and Chaudanga while phase-2 and 3 is expected to be next five years.

There are four components of the program while the LGED components are comprised of Component 2: Upgrading secondary and tertiary roads and complementary logistics infrastructure and services: Component 3: Project Implementation Support and Sustainability: Component 4: COVID-19 Relief and Recovery.

Project Description

There is total 16 contract packages (CW) under phase-1 of WeCARE project to be implemented by LGED. Of the 16 CWs, seven CW have no land acquisition. This subgroup covers following Package which is CW-01, CW-04, CW-05, CW-07, CW-10, CW-13 and CW-16. This subgroup¹ covers the improvement of 12 GCM and 165.688 km of adjacent 29 roads under the project area. This RAP is prepared following RPF of WeCARE for this subgroup components to guide resettlement and the consequent preparation and implementation.

Resettlement Impacts Identified

The survey result reveals that a total of 437 commercial squatter, 10 Upazila parishad and 7 Market somiti will be affected with economic displacement for relocation of business premises during the construction period. On the other hand, no resettlement impacts have been identified within the proposed alignment for upgrading of road network.

The census identified that 486 shops will require to be dismantled and accordingly 486 business operators will be affected due to shut down of shops for relocation of business during construction period. The survey also identified that 58 wage laborers and 201 tenants and 93 Vulnerable HHs will be affected from the affected shops by the project intervention. Of the total affected HHs, 1609 PAPs have been identified and will be affected by the project intervention but none of them will be physically displaced since their residential premises are not affected. A total of 93 vulnerable people have been identified during the survey, among

¹ CW-01, CW-04, CW-05, CW-07, CW-10, CW-13 and CW-16

them, 83 HHs have been identified as income under the poverty line (BDT 10,500/month), 5 people with disability and 5 HHs are headed by females.

Relocation and Livelihood Restoration

No land acquisition will be required for upgrading of road network activities and GCMs under CWs of this RAP. None of the affected shop owners and vendors need any permanent relocation during or after constructions of GCM. Indeed, the GCM activities will be carried out even during construction period in the available alternative location of the selected GCM. The shop owners and vendors will shift their business at the preferred alternative location for the time being during construction period. The project will manage the shifting process in consultation with market committee. To restore livelihood of the affected entities, LGED will provide resettlement compensations and multiple resettlement benefits including compensation for structure, transfer & reconstruction grant, loss of business, loss of wage laborer, loss of income from rented-out and rented in commercial premises, grants for vulnerable household and seed grants for vulnerable HHs. No resettlement site at alternative places will be required for the affected entities under these CWs.

Cost Estimate and Budget

At this stage, a provisional total for RAP implementation and other associated costs has been estimated. The total estimated RAP budget stands at BDT **90,931,434**. This budget will be finalized based on joint verification committee (JVC) and Property Valuation Advisory Committee (PVAC) recommendation following RPF guidelines. In the end, this budget will be finalized following the recommended rate by PVAC.

1 Introduction

1. This Resettlement Action Plan (RAP) is prepared by Local Government Engineering Department (LGED) in accordance with the project's Resettlement Policy Framework (RPF) along with the Government of Bangladesh's (GoB) legal policy and World Bank's (WB) Environmental and Social Framework (ESF), specifically environmental and social standard-5 (ESS-5) "Land Acquisition, Restrictions on Land and Involuntary Resettlement".
2. The program will cover 10 districts including Jashore, Jhenaidah, Magura, Chaudanga, Satkhira, Natore, Sirajganj, Kushtia, Pabna and Meherpur. The anticipated time for phase-1 is five years for four districts Jashore, Jhenaidah, Magura, and Chaudanga while phase-2 and 3 is expected to be next five years. LGED will develop and upgrade complementary logistics infrastructure and services including rural markets in selected growth centers; and upgrade secondary and tertiary road network serving selected markets. There are four components in this program and among them component 1 will be implemented by RHD; component 2 and Component-3 will be implemented by LGED; and component 4 will be jointly implemented by LGED and RHD.
3. It sets out the principles and objectives governing preparation and implementation of this social risks and impacts, mitigation measures in accordance with the ESS-5 requirements. The aim is to ensure that adverse socio-economic impacts of the programs on Project Affected Persons (PAPs) are adequately mitigated, and the PAPs are not worst off as a result of project interventions. This RAP is for the project subgroup which includes seven packages CW-01, CW-04, CW-05, CW-07, CW-10, CW-13 and CW-16. This subgroup doesn't need any land acquisition.

1.1 Sub Group and Its Resettlement Impacts

4. This RAP is prepared for seven packages (CW-01, CW-04, CW-05, CW-07, CW-10, CW-13 and CW-16) to guide resettlement and the consequent preparation and implementation of the project by LGED under the Western Economic Corridor & Regional Enhancement Program -LGED (WeCARE-LGED) financed by the World Bank.
5. This subgroup covers 12 GCM and 29 adjacent roads which covers 165.688 km is implementing to improve connectivity, market, and infrastructure improvement under WeCARE Program. Most of the shops in all the GCMs are made of CI sheet roof and brick wall. For the improvement of those GCM, some business premises will be affected temporarily while there is no impact on the houses or productive land for upgrading of road network of these 07 packages. Details of roads description of adjacent 29 roads under this subgroup are as follows:

Table 1: Component of the subgroup

CW	GCM	Road	Scheme Code	Scheme Name	Length (km)
CW-1	Haibatpur	7 roads which covers 30.073/57 km Jashore Sadar under the Jashore district	241474001	Haibatpur-Pranpur Road	5.223

Total					165.688

1.2 Socio-Economic Profile

6. The census and inventory of losses survey identified 437 households with a total population is 1609. The average HH size is 3.68 which are lower than the national average HH size of 4.06 in 2016. Among the affected households less than 2% are headed by females and more than 98% are headed by male that significantly varies with the statistical data of the World Bank 2018 (84.20% Male headed and 15.80% female headed HHs). It is seen that 36.05% males and 32.82% females are in working age (15 to 60A total of 93 vulnerable people has been identified during the survey, among them, 85 HHs have been identified as income under the poverty line (BDT 10,500/month).

Table 2: Socio-Economic Profile of the Affected Households

Socio-economic information		Male	%	Female	%	Total	Grand Total

1.2.1 Project Cut-off Date: Title and Non-Title Holder

- The World Bank's ESS 5 on Involuntary Resettlement is relevant for this project which requires that the economic, social, and environmental risks are mitigated, and livelihoods of the displaced persons are restored. The unavoidable impacts related to project implementation was identified through census and socio-economic survey. Consultation meeting has been held at every GCM and disseminated project information, rolled of the project and the affected people, compensation payment procedure, cut-off date, etc. A comprehensive resettlement action has been prepared for the affected people to compensate them following the ARIPA 2017 and WB ESS 5.
- Cut-off dates are applicable for the affected people in terms of assessment of compensation and preventing fraudulent claims. Date of commencement of census and inventory of losses survey are the cut-off dates for the squatters. Cut-off date was established for every growth center during consultation meetings. The cut-off date was declared during conducting consultation meetings in the respective GCMs. All the GCM were video filmed before conducting survey to prevent further fraudulent claims

Table 3: Cut-off date for non-titled

2 Resettlement Impacts

2.1 Introduction

9. Census and Inventory of Loss (IOL) were conducted to determine the overall impact of the project. There will be no land acquisition for this Project component. There will be a sum of structure affected during the project intervention. All the affected structure is on government land. In case of impact on structures or other assets, adequate compensation and resettlement benefits will be paid following the RPF for LGED under WeCARE project.

2.2 Magnitude of Resettlement Impacts

10. The survey result reveals that a total of 437 squatters are affected by loosing of business structures at that allocated GCM and no impact identified for upgrading of road network. The degree of resettlement impacts has been considered as low. Apart from these impacts, there will be one structure affected owned by Upazila Parishad.
11. The census identified that 657 structure will require to be dismantled and accordingly 486 business operators will be affected temporarily by losing their business as the business operators have to shift their business for construction work and will return to the market after upgrading the GCM. The survey also identified that 58 wage laborers and 201 tenants will be affected from the affected shops by the project intervention. Total 93 of affected people have been identified as vulnerable considering their income level. Of the total affected HHs, 1609 PAPs have been identified and will be affected by the project intervention but none of them will be physically displaced since their residential premises are not affected. Tables below shows the EPs by impacts.

Table 4: Total entities affected by the project

Sl. No.	Project Impacts	Total
A	Number of squatters losing commercial Structure	437
B	Number of Upazila Parishad	10
B1	Number of markets Somiti	7
C	Total number of Project Affected Units (A+B)	454
D	Total number of persons affected from entities	1609
E	Total number of structures	657
F	Number of tenants affected	201
G	Number of business loss (own+ tenants)	486
H	Number of wage labourer affected	58
I	Vulnerable HHs	93
J	Vendor Affected with temporary structure without fence	19

Source: Census and IOL survey, June to July 2022

2.2.1 Use of Affected Structure

12. Impact by use of structure shows that all the affected structures are used commercially. Total 535 shops have been identified by the IOL survey which are operated by 486 businessmen. Of the business operators, 285 businesses are operated by shop owners, and 201 bossiness by tenants. Due to temporary closing of business 58 wage laborers will be

affected by losing their employment. Table below shows the impacts by affected structures by market.

Table 5: Use of affected structure

SL No	Impacts	Unit	Total
1	Affected shops	No	535
2	No. of Structure owners	No	454
3	Affected Business Operator	No	486
3.1	Business running by owner	No	285
3.2	Business running by tenants	No	201
4	No. of wage labour affected	No	58
5	Vendor affected with temporary structure without fence	No.	19

Source: Census and IOL survey, June to July 2022

2.3 Impact on Structure

13. The IOL survey identified that total 592 primaries commercial structures and 65 secondaries structures will be affected that covered 119901.5 floor area. Total 657 commercial structures belong 454 owners. Detailed of the impacts shows in the following tables.

Table 6: Impact on Structure

Total Entities	Affected by only Primary Structures	Affected by only secondary structure	Total	Floor Area (sft)
454	592	65	657	119901.5

Source: Census and IOL survey, June to July 2022

2.3.1 Impact on Primary Structure

14. Various categories of commercial structures have been identified within the proposed area. These include Pucca (concrete roof with bricks wall), Semi-pucca (CI sheet roof with bricks wall), Tin-made (CI sheet roof and fence), Katcha (CI sheet roof with wooden/bamboo fence), and Thatched (straw roof with bamboo fence). Out of the total affected structures (115438.5 sft) major quantity is Semi-pucca (52661.5 sft) followed by Katcha (42705 sft), pucca (9905 sft), and tin-made (10167 sft).

Table 7: Quantity of affected primary structures

S.L	Category of structure	Unit	Total	
			No	Quantity
1	Pucca	Sft.	36	9905
2	Semi-pucca	Sft.	270	52661.5
3	Tin-made	Sft.	94	10167
4	Katcha	Sft.	192	42705
6	Total	Sft.	592	115438.5

Source: Census and IOL survey, June to July 2022

2.4 Impact on Secondary structure

15. Of the total 65 secondary structure, 50 veranda covering 3928 sft area is highest. There are also boundary wall, RCC pillar, toilet and tube well that will be demolished by the project.

Table 8: Quantity of affected secondary structures

Type	Code	No.	Quantity
Bench	Rft	1	10
Boundary Wall	Rft	1	40
RCC Pillar	Nos.	2	136
Sanitary Toilet	Nos.	5	7
Slab Toilet	Nos.	1	1
Tin Shade	Sft	3	535
Tube well	Nos.	1	2
Veranda	Sft	50	3928
Water Pump	Nos.	1	2
Total		65	4661

2.5 Temporary Loss of Income from Affected Business

16. As per the census and IOL data, there are total 486 affected business owners operating their business in 657 structures.

Table 9: Number of business units affected

	Affected persons losing business structures	Number of affected business structure	Affected persons losing business income
Total	437	657	486

Source: Census and IOL survey, June to July 2022

2.5.1 Impact on Wage Labor

17. As per the census, total 58 employees of shops/commercial enterprises have been identified who will lose their income due to the project. It is to be noted that only regular (monthly salaried) wage laborers have been enlisted during the survey. Daily wage earners/day laborers are not engaged by a particular shop owner. They work on 'no work no pay' basis. Therefore, day laborers will not get resettlement assistance from the project.

Table 10: Number of Wage Labor

Affected wage laborers/employees by location	Number of wage laborers
Churamankati Bazar	1
Haibatpur	0
Ghorepara	0
Ruhita Bazar	1

2.6 Impact on Vulnerable People

18. Total 93 vulnerable people found during the IOL survey including income poverty, female-headed, disabled-headed. They will be taken care of them including resettlement benefits, Income livelihood restoration program, skill development training, and linkage with different GO/NGO programs following the RPF of this project.

Table 11: Number of vulnerable

Type of vulnerable	Total
People with physical disabilities	5
Under Poverty Line	83
Female HH Head	5
Total	93

Source: Census and IOL survey, June to July 2022

2.7 Categories of Losses Based on Entitlement Matrix

19. There is a fixed entitlement matrix adopted in the resettlement policy framework for all the package of WeCARE program. This sub-group only five of entitles are applicable considering category of losses. As there is no land acquisition, all the commercial structures are measured as non-titled. Therefore, physical displacement of the people from their place of residence will not take place. There are total 115,438.5 sft from 592 primary structures which is owned by 454 squatters. Due to impact on the commercial structure 486 business operators will be affected temporarily, Total 201 tenants and 58 wage laborers will also be affected due to dismantling of the business premises. Table below shows the overall impacts on the structure as per entitlement matrix.

Table 12: Categories of losses based on Entitlement Matrix

Sl #	Losses Items	Unit	Total
1	Primary Structures	Sft.	115,438.5
2	Secondary Structures	Sft.	4, 661
3	Compensation for business losses	Nos.	486
4	Wage Labour	Nos.	58
5	Loss of Income from rented-out commercial premises	Nos.	201
6	access to rented-in commercial premises	Nos.	201
7	Vulnerable household.	Nos.	93

3 Consultation and Participation

3.1 Introduction

20. The Local Government Engineering Department (LGED) now implementing rural connectivity, market, and infrastructure improvement in the four (4) WeCARE Program Districts, namely Jashore, Jhenaidah, Magura, and Chaudanga in phase 1. The stakeholder's consultation meetings (SCMs) for seven packages covers the improvement of 12 GCM and the widening of 29 roads adjacent to the road network under the project area. Twelve meeting was held, at the 12 GCM. During preparation of RAP, LGED has conducted 12 consultation meetings and workshops with different stakeholders. The discussion and the concerns and responses are extensively documented in SEP. The summary of consultation meeting is given below:

Table 13: Summary of Consultation Meetings and FGDs

3.2 Outcomes of Consultation Meetings

21. During preparation of RAP, LGED has taken stakeholders opinion and those are incorporated with the entitlement matrix preparation. Consultations have been conducted with the affected PAPs, local stakeholders, and beneficiaries while their feedbacks and suggestions have also considered this RAP. The summary of outcomes is given below-

3.2.1 Proposed outcomes from the 12 consultations meeting.

22. The Following issues were discussed by the audience:

- ☐ Adequate compensation such as business loss, loss of structure, livelihood, loss of employment, tenants should be provided. The amount is sufficient to replace assets in an open market and also supplement transaction costs.
- ☐ The Non-titled persons will be affected and should consider for resettlement supports
- ☐ All the internal roads of the Growth Center should be made by RCC/CC or unblock.
- ☐ Road should be wide, full carpeting and pedestrians' facilities for local peoples.
- ☐ Load bearing capacities should be calculated before construction.
- ☐ The local laborers to be given priority in the project work.
- ☐ Grievance mechanism must be communicated in clear terms.
- ☐ Arrangement for alternative means of communication for ease of the elderly, disabled, pregnant women and children.
- ☐ People expressed concerns over the influx of migrant workers for the project's construction work and their possible engagement in illicit sexual relationships with women and children

- ❑ Arrangement of Drainage System and dedicated Solid including plastic and liquid waste dumping place and their effective management by turning garbage into renewable energy.
 - ❑ Expansion of Growth Center Market (GCM) facilities, covering- construction of cold chain facilities, all weather shed for dumping agro products, vehicle parking area for wholesale buyer's trucks, gender segregated toilets, childcare/breastfeeding centers, Internet kiosks, medical center with a laboratory corner for checking food adulteration (lactometer, formalin Testing kit, weighing machine etc.), Green Space for socializing etc.
 - ❑ Office space for Bazar Bonik Samity, Workers Union, Market Management Committee, Woman business operators, etc.
 - ❑ There could be some provision of developing a Housing Society centering the Growth Center – and that needs to be conceived now.
 - ❑ If the GCM or nearby marketing facilities are by the river/canal side, than a proper 'Boat landing Platform' should be constructed for ease of the local community.
 - ❑ The Growth Centers may have IT based training Centers, and other training facilities run by Social Welfare Division/Youth Development department.
 - ❑ Improvement or capacity building of nearby Mosque/religious entity for the ease of the local community
 - ❑ Dedicated hygienic slaughter house in the market area
 - ❑ Community Center where the local community could gather for social events like wedding etc.
 - ❑ Solar Street Lights; small cold storages using solar panel for preservation of seeds etc.
 - ❑ CCTV coverage of the Market, important establishments including transport parking areas.
 - ❑ In this part of Bangladesh women are comfortable working at homestead and the society look down to women who work in the field. As such, participation of women in road construction project would be low.
 - ❑ Afforestation to immediately follow chopping of trees along the highway. Chopping of trees would adversely affect the bird habitat.
 - ❑ Many private clinics are located along the highway generating large amount of medical waste. These needs to be disposed of safely and needs to be integrated with the overall growth center development.
23. During consultation with different stakeholders including land and different structure owners, squatters, CPR management and wage earners etc., LGED has registered all the concerns raised by the potential affected people. All the issues and responses are attached with the Annex.

3.3 Incorporation of Consultations outcomes

24. The feedbacks received from the stakeholder consultation meetings have been considered in the RAP. The entitlement matrix has been revisited regarding compensations items and rates based on the consultation meetings. The suggestion provided on the design shared with the design team and has been incorporated as well. The Design team and safeguards consultants also shared the design with the local stakeholders and beneficiaries to get consent for effective planning and implementation.

4 Relocation and Livelihood Restoration

4.1 Introduction

25. No land acquisition will be required for upgrading of road network activities and GCM under CWs of this RAP. None of the affected shop owners and vendors need any permanent relocation during or after constructions of GCM. Indeed, the GCM activities will be carried out even during construction period in the available alternative location of GCM.
26. Non titled PAPs have been affected by the subgroup, all the affected HHs are squatters affected by commercial structures. Due to this impact, 486 shops and 58 wage laborers will be affected. The shop owners and vendors will shift their business in consultation with market committee at the alternative location for the time being during construction period. To restore livelihood of the affected entities, LGED will provide compensations and different resettlement benefits including compensation for structure, transfer and reconstruction grant, loss of business, loss of wage laborer, loss of income from rented-out and rented in commercial premises, grants for vulnerable household, and seed grants for vulnerable HHs. No resettlement site at alternative places will not require for the affected entities under these CWs.

4.2 Livelihood Impact and Risks

27. The impact identified is only related to temporary economic displacement. In this regard, the impacted squatters anticipated temporarily income loss due to loosing current business during construction period. According to the livelihood assessment, affected businessman want to continue their business in alternative places within the GCM for the time being during the construction period. The project has taken care of their suggestions and developed a livelihood and relocation strategy to minimize project impacts.
28. They want to enhance more skill on their current profession, and they requested skill development support along with other IGA including technical training (motor mechanical, mobile repairing), tailoring, beauty parlor training, agriculture, homestead farming, poultry, fisheries etc., for their family members. If proper planning for income and livelihood restoration is not taken, implementation of the project may severely affect the livelihood of the PAPs. Owners may fail to utilize their money in income generating alternatives. These occurrences may push the affected people into conditions worse than before the project began. Quick payment of compensation and other benefits as per policy and proper planning and guidance by the Social Consulting Firm concerning the utilization of compensation money by the affected people will improve the chances for the restoration of livelihoods.

4.3 Income and Livelihood Restoration

29. According to the survey, about 454 entities, including 437 structure owner, 201 tenants and 58 wage labour, are going to be affected due to the project interventions for seven packages. All the displaced structure and business entities will be paid compensation following the Entitlement Matrix
- Replacement Value (RV) and dislocation Allowance as recommended by PAVC.

- Transfer Grant at actual cost which will include labor cost and transportation cost
- Reconstruction Grant in actual cost which will include land development, labor cost and transportation cost
- LGED in collaboration with PIU, local government and RAC will make best efforts to identify alternative residential or commercial sites for the affected HHs.
- Owner will be allowed to take away all salvageable materials, trees and harvest crops and fish stock free of cost.
- Dismantling cost for non-shiftable structure will be determined by the PVAC and PIU based on the actual price and consultation with affected HHs.
- One-time Assistance for alternate rental based on the average rental rate/month within the project influence area determined by PVAC and transitional allowance @ three months' rental cost.
- Grant to cover temporary loss of regular wage income @ average wage/day in the locality for 30 days for wage labour or as determined by PVAC. Income and livelihood restoration assistance, to be created by the Project.
- Income restoration grants for three months based on the average monthly income loss
Skill training and credit support under income generation program. Special Assistance of a one-time payment for vulnerable household as each female-headed, disabled-headed, elderly-headed and poor household as decided by RAC and/or PIU. All the vendors and squatters will be eligible for Skill training and credit support under income generation program.

Project Relocation Strategy:

30. According to the results of IoL survey and livelihood assessment, there are some pucca, semi pucca, tin made and katcha shops, and pucca and semi pucca business sheds (without wall) and open business place for the vendors within the GCM area. The project will plan for improvement activities of the GCM following the existing condition of the market so that the business operators experience minimum impact. The following relocation strategy will be adopted to minimize livelihood impacts.

- Affected business units will be relocated temporarily within the GCM area based on availability of GCM area and thereafter, the existing structures will be reconstructed/ improved. Indeed, the GCM activities will be carried out even during construction period in the available alternative location of GCM. The shop owners and vendors will shift their business in consultation with market committee at the alternative location during construction period. After reconstruction of the premises, fresh allocation based on consensus with the Market committee will be done and preferably in a cluster manner. After reconstruction of the premises, fresh allocation based on consensus with the Market committee will be done and preferably in a cluster manner. Therefore, very minimum impact on the affected business and livelihood might be occurred. For facilitating the vendors doing business under the common business sheds, construction activities will be stopped on the weekly “HAT” (Bazar) date.

- If any business operator opines to move elsewhere temporarily beyond the GCM, project will provide associate assistance for their business relocation. The shop operators will have access to GCM after improvement of the sheds/marketplace.

4.4 Income and Livelihood Restoration Strategies

31. Mitigation of loss of assets and livelihood is the main focus of the RAP. LGED will provide appropriate support to the livelihood restoration aspects to cope with business relocation. Income and livelihood restoration strategy will focus on their post-relocation situation and adopt appropriate mitigation measures to uphold their standard of living. Short-term and long-term mitigation measures have been formulated in this RAP. Affected Business enterprises will get support and compensation for loss of business for a certain time being as short-term mitigation measures from the project in terms of relocation and income restoration. In addition, vulnerable EPs will receive special support and also get preference for employment in civil construction works. It is expected that the short-term measures of compensating the loss of income will largely mitigate the livelihood impacts.
32. The project has already provisioned special allowance for affected vulnerable and female-headed households. In addition, the LGED will initiate with the help of local administration to include all vulnerable PAPs to existing social safety net programs run by the government such as the Vulnerable Group Feeding (VGF) Program, Vulnerable Group Development (VGD) Program, Employment Generation Programs, etc. The local government institutions (LGI) like the Union Parishads (UP - a sub-district comprised of several UPs)/Municipality identify the vulnerable households and persons for VGF, VGD and other social safety net programs. LGED will request the elected LGI representatives (Chairmen/Mayors) to include the vulnerable PAPs in the ongoing government-sponsored safety net programs through the Upazila Nirbahi Officers (UNO - chief executives of sub-district administrations). LGED will prepare lists of vulnerable PAPs and provide those to the LGI representatives and liaise with the UNOs and LGI representatives to operationalize the mechanism.
33. According to the survey, the major income generating sources of the project area are small business, agriculture, livestock and fisheries. The project will consider the present IGA sources and will prepare a mitigation plan following the needs assessment of the PAPs. Table below shows the present IGA sources of the project area.
34. For additional support to usual income restoration assistance as mentioned above, the Social Consulting Firm will specifically assess the needs and skills base of the displaced PAPs of age between 15 to 45 years. The Social Consulting Firm will prepare a list of suitable members of affected households eligible for income restoration intervention with their relevant profile and submit it to the PD for approval. LGED will decide about the ILRP program (Short term or long term) suitable for the vulnerable PAPs. The short-term and long-term livelihood regeneration assistance under the RAP will be organized as mentioned in the table below.

Table 14: Livelihood Restoration Options

Short -Term ILRP	Eligible members of vulnerable households (Male or female headed) earning maximum BDT 10,500 per month and elderly/disabled headed HHs to be displaced from the project site.	Compensation for affected properties including resettlement benefits and allowance as vulnerable HHs (Male headed BDT 10,000 & female headed BDT 15,000), and priority in employment in construction. Training on IGA with seed grant @BDT 15000/trainee
Long Term ILRP	Eligible members of vulnerable households and elderly/ disabled headed HH earning maximum BDT 10,500 per month to be displaced from the project site.	<ul style="list-style-type: none"> i. Compensation for affected properties including resettlement benefits and allowance as vulnerable HHs, and priority in employment in construction. ii. Training on IGA iii. Seed grant @BDT 15000/HH iv. Market linkage v. Linkage with NGO/Financing institutions vi. Regular monitoring of activities

35. Local people in the project area, whose livelihood will be affected by the project, will get preference in jobs associated with the project construction.

36. The project will mobilize available local resources to better or at least restore the livelihoods of the PAPs. The project will communicate with development partners and NGOs with ongoing activities in the project area and recommend them to include PAPs in their programs. The LGED will communicate with all development agencies active in the area to mobilize their resource and channel the development opportunities to all PAPs. One such initiative will be to pursuing active Microfinance Institutions (MFIs) in the area to set up a credit program specific to PAPs. In such a way, the project will explore the readily available opportunities provided by the government, NGOs or any other development partners and guide the PAPs on how to benefit from these organizations and agencies.

4.5 Rehabilitation Measures

37. Necessary rehabilitation measures for the vulnerable PAPs have suggested in the entitlement matrices of the RAP. It is expected that the proposed rehabilitation measures for restoration of income and livelihood would help the affected people to uphold or at least restore their livelihood standard. FGD results show that PAPs preferred technical training including motor mechanical, mobile repairing, computer, beauty parlor, tailoring training, driving, and different skill development training along with employment opportunities, in construction work and assistance/loan from other ongoing development scheme, Assistance/loan arranged through this project etc.

4.5.1 Assistance to Vulnerable Groups

38. Vulnerable households including women headed household, elderly headed households and households below poverty line will be entitled to:

- Additional allowance for loss of land or other assets; and,
- Prioritized employment once civil work begins

4.5.2 Gender Considerations

39. Compensation for lost assets including land, structure, trees, crops, etc. will be paid to actual owners irrespective of gender considerations as per RPF policy and Bangladesh Labour law 2006 policy. Compensation will be paid in joint name with women as first holder. Clearly demarcated areas including separate toilets, shaded rest areas, private breastfeeding corners, etc. for the female workers will be provided in the construction camps. Equal salary for the male and female would be ensured by LGED and the contractors during undertaking the work. Male and female will be separately consulted in different groups and their complaints will be initially resolved in the focus group discussion.

5 Resettlement and Compensation Budget

5.1 Introduction

40. Compensation and entitlements have been identified based on impacts and losses, as described above and in other sections of this document and they will be similar to those approved under development projects in Bangladesh. Following table represent compensation and entitlement matrixes for various categories of impacts so far assessed during the IoL survey. A person could be eligible for compensation/ entitlement in more than one category based on his awards determined by LGED. The LGED/implementing NGO will generate unique ID number of each EP for better implementation of the mitigation measures. A tentative budget has been prepared based on the rate collected from affected people and local influential people. This budget will be finalized by JVC and PVAC committee following RPF guideline.

5.2 Compensation Assessment Methodology

41. The ARIPA 2017 provides for the payment of compensation for affected assets permanently acquired, including standing crops, trees, and houses and any other damages caused by such acquisition. The value of the property is calculated by conducting Local Market Rate Assessment Survey. LGED will also assess the replacement value in consultation with the authentic source and local known persons. Table below shows the market rate of the affected structures and assets following the guideline of RPF of WeCARE. During the survey, the rate has been assessed from PWD, local stakeholders, relevant professionals, and impacted EPs as well. Previous project of LGED funded by WB as reviewed for analyzing of rate. The rate is used for preparation of a tentative budget and will be finalized assessed by JVC and following the rate proposed by PVAC. Detailed calculation for rate attached with annex. Table shows the rate and summary budget accordingly.

Table 15: Rate for calculating the budget of RAP

Unit of Entitlement	Entitlements	Category of Loss	Rate (BDT)	Remarks
Impact category 4: Loss of residential, commercial structures without title to land (squatters/vendors/encroachers)				
● Non-titled persons owners, vendors and encroachers those own residential and commercial structures (shift able and non-shift able built on GoB land as found during census)	● Replacement value of the structure as determined by PVAC and PIU in consultation with affected HHs. ● Transfer Grant at actual cost which will include labor cost and transportation cost	Pucca (sft)	1,000	Rate adopted from market survey and PWD rate of each category of affected shop (avg. Rate by category)
		Semi-pucca (sft)	800	
		Tin-made (sft)	400	
		Katcha (sft)	200	
		Varonda (sft)	250	
		Slab toilet (no)	5,000	
	● Reconstruction Grant in actual cost which will include land development, labor cost and transportation cost	Transfer Grant (TG) @ Tk 40 per sft of floor area (maximum of Tk 10,000)	10,000	Market survey

Unit of Entitlement	Entitlements	Category of Loss	Rate (BDT)	Remarks
	<ul style="list-style-type: none"> ● LGED in collaboration with PIU, local government and RAC will make best efforts to identify alternative residential or commercial sites for the affected HHs. ● Owner will be allowed to take away all salvageable materials free of cost. ● Dismantling cost for non-shiftable structure will be determined by the PVAC and PIU based on the actual price and consultation with affected HHs. 	<ul style="list-style-type: none"> · Reconstruction Grant (RG) @ Tk. 60 per sft of floor area (maximum of Tk. 5,000) 		
Impact category 8: Loss of income from displaced commercial/ industrial premises (owner operated)				
Any proprietor or businessman operating in premises, at the time of issuance of Notice u/s 4 and/or during Census.	One time Assistance for alternate rental based on the average rental rate/month within the project influence area determined by PVAC and transitional allowance @ three months rental cost.	Loss of income from displaced commercial premises- One time Assistance for alternate rental based on the average rental rate/month @ BDT 2,500 within the project influence area and transitional allowance @ BDT 7,500 for three months rental cost.	10,000	Rate adopted from market survey assessed during IOL survey
Impact category 9: Temporary loss of income (wage earners in agriculture, commerce & small business and industry) for title and non-title				
<ul style="list-style-type: none"> ● Regular wage earners affected by the acquisition. ● Also applicable for non-titled . 	<ul style="list-style-type: none"> ● Grant to cover temporary loss of regular wage income @ average wage/day in the locality for 30 days for wage labour or as determined by PVAC 	Temporary loss of income loss of regular wage income @ average wage/day in the locality for 30	8,000	last six months ave. Rate assessed during IOL survey

Unit of Entitlement	Entitlements	Category of Loss	Rate (BDT)	Remarks
	● Income and livelihood restoration assistance, to be created by the Project.	days @ BDT 8,000		
Impact category 10: Loss of income from rented -out and access to rented-in residential/ commercial premises				
Owner of the rented-out premises as identified by Census and verified by PVAC. Household/person rented-in any such structure as identified by Census and verified by PVAC	One-time Assistance for alternate rental based on the average rental rate/month within the project influence area determined by PVAC and transitional allowance @ three months’ rental cost. Actual shifting assistance	Loss of income from rented -out commercial premises/ One time Assistance for alternate rental based on the average rental rate/month @ BDT 2,500 within the project influence area and transitional allowance @ BDT 7,500 three months rental cost.	10,000	Rate adopted from market survey assessed during IOL survey
		Loss of income from access to rented-in commercial premises/ One time Assistance for alternate rental based on the average rental rate/month @ 2,500 within the project influence area and transitional allowance @ 7,500 three months rental cost. Actual shifting assistance @ BDT 5,000	15,000	Rate adopted from market survey assessed during IOL survey
Impact category 12: Severally affected and Vulnerable HHs and livelihood assistance

6 Institutional and Implementation Arrangements

6.1 Institutional Arrangement

44. **Formation and Responsibility of PIU:** PIU will consist of PD, DPD, XEN, and Sr. Assistant Engineers. PIU will be actively supported by the individual consultant and assistant engineers. PD will be the main responsible person to implement the LGED program. The PIU will ensure that implementation follows both Government and Bank rules and regulations. The PIU will be also responsible for: (i) supervising and reviewing preparation, implementation and providing necessary advice for timely delivery; (ii) monitoring and evaluating implementation progress and suggesting necessary course corrections.
45. (iii) Resolving issues and conflicts that may emerge during implementation; (iv) facilitation coordination and convergence with other line ministries, division, and departments /agencies; and (v) keeping the PSC apprised on overall performance and key issues relating to the project.
46. **Formation and responsibility of PIC at field level:** There will be a project implementation committee (PIC) at field level. The PIU will be actively assisted by PIC. PIC will consist of LGED Local Executive Engineer (XEN), relevant Upazila Engineers (UE) and District Sociologist. PIC will be actively assisted by Consulting Firm. PIC will keep a very close coordination with PIU. As first Phase of the program will be implemented into Jashore, Jhenaidah Magura, and Chaudanga. PIC will be formed based on the implementation area. The XENs will call on the services of District Sociologist posted in each district. The XENs will be directly assisted by the Upazila Engineers (UE – one in each upazila) who will, in turn, be assisted by consulting firms. The Consultant will also assist and support PIU, when required.
47. In respect of non-compliance of legal documents, LGED district and upazila staff from PIC will assess where, and to what extent, this is causing delays in payment of CCL and the consulting firm will support all affected households including title and non-title to receive compensation and resettlement assistance according to ESS5 WB. Where land acquisition will be involved, the LGED XENs and District Sociologists with the support of consulting firm will coordinate with the respective DC offices. In respect of the valuation of structures and trees, the LGED, through its District Sociologists and consulting firm, will give priority to facilitating and expediting the surveys, and increase its participation in the valuation process by PWD and forest offices by providing equivalent officers in the valuation team. Where there is serious concern about the valuation levels proposed, LGED will take follow up action to achieve a satisfactory outcome.

6.2 Project Management and Supervision Consultant

48. The overall responsibility of environmental and social performance including RAP and IPP (if required) implementation of the WeCARE will rest with the PIU. Aside from the PIU safeguard specialist and RAP implementing NGO/consulting firm, the PIU will engage Project Management and supervision Consultant (PMSC) to supervise the contractors including social safeguard management requirements and measures on their execution of construction-related, infrastructural development and other activities that have significant

negative social impacts identified in the RAP. The PMSC will ensure adherence to the monitoring parameters including quality requirements, as well as all social safeguard measures.

49. **Contractor's social safeguard Officer:** The contractor shall have a Social Safeguard Officer on the site who will be responsible to implement all social safeguard, gender and labor issues with the guidelines of PIU/consulting firm. PIU with support of social safeguard specialist and consulting firm will make sure that all contractors workers and counterpart who are involve in project implementation receive both initial and ongoing social safeguard and gender awareness and training sufficient to ensure they are familiar with their social safeguard responsibilities under the ESMP and RPF.

6.3 Capacity Building

50. During implementation of the program, LGED, consulting firms, contractors and relevant officials will be trained on ESF as part of the capacity development under component 4 of this program. Environmental and social safeguards training will help ensure that the requirements of the ESS and subsequent social safeguard are clearly understood and followed by all project personnel throughout the project period.

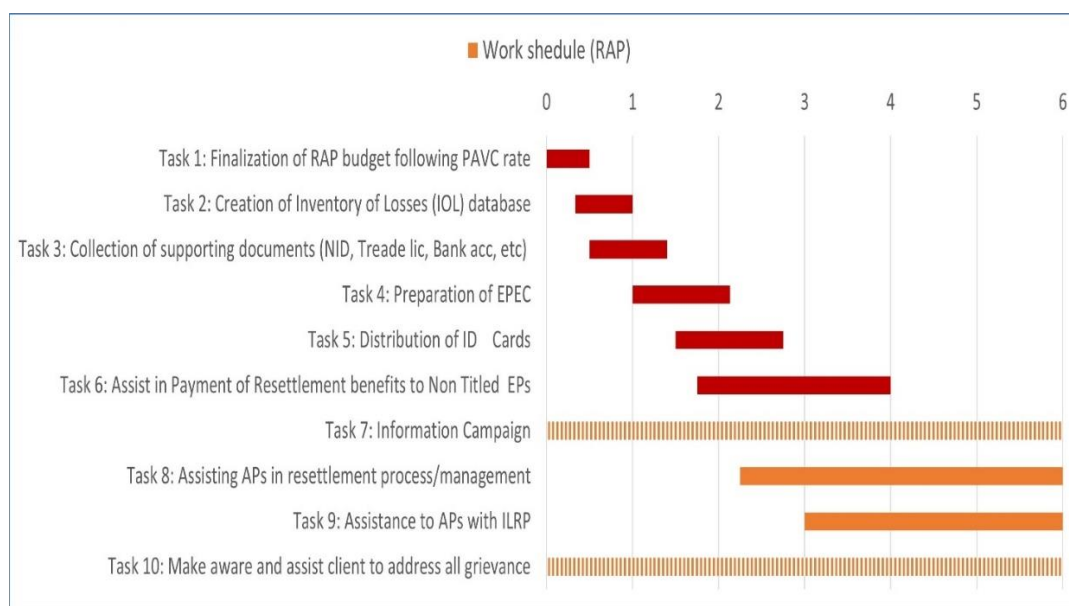

6.4 Guidelines for Bid Documents

51. Physically capable vulnerable PAPs will be given preferential opportunities to work in the project, including earth carrying, bricks carrying, guard, cook, and some other technical and non-technical jobs as per the PAPs capability and skills. Women and vulnerable groups will be given priority for available jobs. Equal wages for male and female for similar types of works will be ensured. Standard labour law of Bangladesh and International Labor Organization (ILO) will be followed during the period the PAPs are employed, as well as the entire construction and operation period.
52. Therefore, during preparation of tender documents, the PIU need to ensure that:
- All relevant RPF items relevant for contractors and firms are included in tender documents (specifications and BOQs)
 - Provide clear information to potential bidders regarding social considerations for the work package/s
 - Submission of supporting documentation/materials of previous experience and track record on RAP preparation and implementation should be mentioned in the instructions to bidders
 - Evaluation of submitted bids should include criteria for adequacy of RAP preparation and implementation responses and costing.

6.5 RAP Implementation Time Schedule

53. As per the proposal, efforts will be made to complete the RP implementation process in about 6 month time for each GCM including a margin of 03 months to redress any unforeseen situations or circumstances that may arise during the implementation for each CW. Step-wise activities will be followed for implementation of RAP. The activities are presented in the implementation schedule. A sample Implementation Schedule has been included.

Table 19: RAP Implementation Time Schedule

6.6 Committee Formed to Deal with RAP Implementation

54. GRC, JVC, PVAC, and RAC committee have been formed on April 24, 2022 to compensate the affected persons/families for the land acquisition, structure, tree, business and other impact during the Western Economic Corridor & Regional Enhancement Program (WeCARE) Phase-1: LGED project implemented by LGED with the financial assistance of the World Bank. Committees will take effective measures solving complaint from affected persons within a short period of time and maintaining transparency.

6.6.1 Grievance Redress Committee.

55. Grievance Redress process will be implemented in four stages: primary level at the Upazila stage, the second at the district level, and the third at the project management stage and) the fourth at the ministry of LGED stage.

Primary Stage (Upazila Grievance Redress Committee)

a) Upazila Engineer, LGED, Related UP.	Convener
b) Chairman/Member/ Councilor, related UP/ Municipal	Member
c) Female member/ councilor, related UP/ Municipal	Member
d) Representative affected person/beneficiary person of the project area	Member
e) Community organizer, LGED, related Upazila	Member secretary

Scope of Work:

- Accepting the complaint of affected person and resolving it based on mutual discussion.
- Inform the affected person regarding land and/or structure acquisition, the impact of livelihood, proper compensation and also related other cooperation.
- File a complaint within one month to the convener of the grievance Redress committee after getting informed about compensation or getting an identity card.
- If the grievance is covered by the process of land acquisition law or existing law, in that case committee will suggest applying to the DC/legal authority.
- That related person should be called to the dispute resolution meeting and will have to be allowed to raise his grievance.
- If the grievance of affected person is covered by the resettlement policy, then assist to get the compensation from the project authority.

- g) Provide the decision within fifteen days after getting the grievance of affected person.
- h) Write down all information related to the grievance of the victim.
- i) Inform the affected person regarding the progress of his grievance and the decision of the committee.
- j) Preserving Records and informing the project director regarding all the meeting minutes related to the dispute resolution.

Second Stage (District Grievance Redress Committee)

a) Executive Engineer, LGED, related district	Convener
b) Chairman/ Vice Chairman, related Upazila Parishad	Member
c) Upazila Engineer, LGED, Related UP.	Member
d) Land Acquisition and Resettlement specialist, Implementation Support to Environmental & Social Safeguards Consultancy Service, WeCARE Project.	Member
e) District Sociologist, WeCARE program, LGED	Member Secretary

Scope of Work:

- a) District Sociologist, WeCARE program, will submit grievance and first stages decisions to the District Grievance Redress Committee.
- b) District Grievance Redress Committee (DGRC) will call the meeting within fifteen days of complaint receiving.
- c) District Grievance Redress Committee (DGRC) will provide a decision within thirty days.
- d) District Sociologist, WeCARE program, will incorporate the decision of the District Grievance Redress Committee (DGRC) and issue the minutes of the meeting.

Third Stage (Grievance Redress Committee for Project)

a) Project Director, WeCARE Program, phase 1, LGED	Convener
b) Executive Engineer, PIU, WeCARE Program, Phase 1, LGED	Member
c) Land Acquisition, Resettlement & Income restoration Specialist, WeCARE Program, Phase 1, LGED	Member
d) Environmental & Social Safeguards Specialist, Project Management Consultant, WeCARE Program, Phase 1, LGED	Member
e) Deputy Project Director, WeCARE Program, phase 1, LGED	Member Secretary

Scope of Work:

- a) Executive Engineer, WeCARE program LGED, will present the disputed decision of 1st & 2nd stages meeting to the Grievance Redress Committee for Project.
- b) Grievance Redress Committee for Project will call the meeting within fifteen days and will provide a decision within sixty days after receiving the grievance.
- c) Executive Engineer, WeCARE program LGED will take the necessary action considering the advancement of decision implementation of Grievance Redress Committee for Project.

Fourth Stages Grievance Redress

Fourth Stages Grievance Redress Committee will consist of the level of the ministry of Local Government, Rural Development and Cooperative. If any grievance remains disputed at the third stage case PD (chair of 3rd stage GRC) will present it to the ministry to initiate the necessary action.

6.6.2 Joint Verification Committee

a) Executive Engineer, LGED related district	Convener
b) Land Acquisition Officer, related district	Member
c) Resettlement Officer, Implementation Support to Environmental & Social Safeguards Consultancy Service, WeCARE Project.	Member Secretary

Scope of Work:

- Determining the classification of affected land or water body.
- Determination of classification, size, and quantity of affected crops, trees/Type of shrub plant.
- Determining the type of structure of affected business, residence, commercial and community property.
- Determine the entitled and non-titled ownership status for all types of affected property, Business or structure.
- Recognizing the skilled and unskilled wage labour.
- Recognizing the affected small indigenous people.
- Providing support to implement the Resettlement Policy Framework.

6.6.3 Property Valuation Advisory Committee

a) Executive Engineer, LGED, related district	Convener
b) Land Acquisition Officer, related district	Member
c) Resettlement Officer, Implementation Support to Environmental & Social Safeguards Consultancy Service, WeCARE Project.	Member Secretary

Scope of Work:

- To compensate the affected persons for affected land, structure and trees due to acquisition based on compensation policy at market rate, Identify the current market price for land, structure, tree and other property by conducting property valuation survey and sign the list.
- To compensate for the affected properties of affected people who are residing on the land of different government agencies, the committee will revise the current market price after conducting of price survey and sign into the price list.
- Provide assistance to the project authority to improve the condition of affected people, enhance their income and production and improve their quality of life.
- Assist to ensure the benefits of affected poor victims.
- Assist in determining the exact compensation of affected property and distribute the compensation money through cheque.
- Determining the wages of the skilled and unskilled wage labour.
- Determining the compensation package after discussing with the affected small indigenous people.
- Submit the related documents/report to the related project director after conduction of the above activities following the time bound of the project.

6.6.4 Resettlement Advisory Committee

a) Upazila Engineer, LGED, related Upazila	Convener
b) One Male & Female representative, nominated by related UP.	Member
c) 3 representatives from the different professions and affected person nominated by Related UP. (Minimum one female mandatory).	Member
d) Resettlement Officer, Implementation Support to Environmental & Social Safeguards Consultancy Service, WeCARE Project.	Member Secretary

Scope of Work:

- a) Assist the implementing authority to identify the local problems and initiative to resolve it for implementing the Resettlement Plan.
- b) Any function belongs to the committee according to the Resettlement Framework.

Annex 7: SOCIO-ECONOMIC PROFILE

Introduction

This section deals with the general baseline socio-economic profile of the project area and affected households. Socio-economic details of the affected households were collected during the social studies. In addition to the specific social information collected during the census survey, general socio-economic information was also collected through individual household-level surveys among the affected entities in the project footprint to prepare an overall socio-economic profile of the affected households and people.

Socio-Economic Profile of the Affected Households

The Socioeconomic profile deals with various socio-economic details of the surveyed households (437 HHs covering 1609 people) based on the finding of the survey. Demographic and socioeconomic information along with potential impacts on the people and community were collected from the affected people during the survey.

Demographic Characteristics in Project Affected Area

The census and inventory of losses survey identified 437 households with a total population are 1609. The average HH size is 3.68 which is lower than the national average HH size of 4.06 in 2016. Among the affected households less than 2% are headed by females and more than 98% are headed by males that significantly varies with the statistical data of the World Bank 2018 (84.20% Male headed and 15.80% female headed HHs). A detail of the demography is shown in the table below.

Table 1: Demography of the project affected households and people

GCM	HH	Male HH	Female HH	Male No.		Female No.		Total Population No.	HH. Size
				No.	%	No.	%

Source: Census and IOL survey, June to July 2022

Age and Sex Composition

The census and inventory of losses survey show that among the affected people about 54.69% are male and 45.31% are female. Among the male PAPs, about 23.41% are recorded in the age

group up to 15 years while about 65.91% are in the age group 15-60 years (working force), and 10.68% are over-aged (more than 60 years). It is also revealed that among the female PAPs, about 22.50% female fall into the age group less than 15 years and about 72.43% are in the age group 15-60 years (working age) while 5.08% of females are in the age group more than 60 years. It is seen that 65.91% of males and 72.43% of females are in working age but 59.89% male and 1.65% female are involved in income-generating activities and the remaining are dependent members of the family (chapter 3.2.7). A detail of the location-wise age group by sex is shown in the following table.

Table 2: Affected people by age and sex

Age	Male		Female		Total	
	N	%	N	%	N	%
Up to 5	62	7.05	59	8.09	121	7.52
5+ to 15	144	16.36	105	14.40	249	15.48
15+ to 30	203	23.07	185	25.38	388	24.11

Marital Status

Considering marital status among the affected population, 512 males and 482 females are married. Of the total married, there is no one found below the age 15 years, meaning child marriage does not exist in the project area. It is seen those 11 women in the age group above 60 years, 8 women at the age group between 30-60 years and 2 women age group between 15-30 are reported as widows. Among the male, 3 aged more than 60 years found widower.

It reveals that the death rate of males is higher than that of females in the same age group. A detail of the marital status by age group in all locations is shown in the following table.

Table 3: Marital status of Male and Female by Age

Age	Married		Unmarried		Widow/ Widower		Total		
	Male	Female	Male	Female	Male	Female	Male	Female	Total
Group									
Up to 5			62	59			62	59	121

Household by Religion

Among the affected people, the Muslim populations are about 86.04% whereas the Hindu population is 13.96%. Other religious people are not affected by the project interventions. The following figure shows the distribution of households by religion.

Table 4: Household by Religion

Religion	No.	%
ISLAM	376	86.04
HINDU	61	13.96
Total	437	100.00

Source: Census and IOL survey, June to July 2022

Education

The literacy rate in the project area is about 89.31% which is much higher than the national literacy rate (74.68 in the year 2019) of Bangladesh. Among the affected people, the male is found more educated than the female. Up to Class IX-X, the female students were found more than male students. This is due to government financial support for female students. Since 1980s secondary school enrolments of girls jumped from 39 in 1998 to 67 in 2017. After Higher Secondary Certificate (HSC), female students become significantly low. This is due to marriage and social custom.

Table 5: Education level of the PAPs

Education Level	Male (%)	Female (%)	Total (%)

Income and Poverty of HHs

It is known that the project affected area (Growth Center) is full of small business units/shops run by poor people for their livelihood. Most of the business units are small or medium scale and a very few are large scale. The income level of the small businessmen is quite low. According to the income level of the affected households (437), a total of 93 vulnerable people has been identified during the survey, among them, 83 HHs have been identified as income under the poverty line (BDT 10,500/month). Of the total HHs living under the poverty line, 78 HHs are headed by males and 5 headed by female.

Households living below the poverty line² and disabled headed are called vulnerable and they

² According to the Household Income and Expenditure Survey (HIES) 2016 of the Bangladesh Bureau of Statistics (BBS) income poverty of the poor in Khulna Division is BDT 8550 (2106/per person) for HH size of 4.06.

will be entitled to additional grants on top of other compensation. They will also be provided skill development training (one from each vulnerable HHs) under the RAP policy on income-generating activities with a seed grant, market linkage, and linkage with financing institutions under the income and livelihood restoration program (ILRP). Apart from these, vulnerable people will get preferential employment opportunities in the civil construction of the project according to their eligibility. The table underneath presents the income level of the affected households.

Table 6: Income and the poverty level of the HHs

Income range	Male	Female	Total	%
Up to 10500	82	3	85	19.45
10500-21,000	225	2	227	51.95

Occupation Pattern

As per the socio-economic survey, 33.50% of total affected person are engaged with income generating activities. Of the total income generating activities, businesses appear to be the main occupation (24.30%). Among the male population, most of the eligible and capable members (59.89%) are involved in income-generating activities which is 1.65% for women. Females are mostly housewives (66.26) and are also involved in allied activities focusing on maintaining household chores. About 26% people are found, students. Around 1.68% are found to be totally unemployed although they are educated and willing to work. Around 1.49% of people are retired and old, but they are the heads of the HHs. Income and livelihood restoration programs can enhance the capacity of the people particularly female and vulnerable people for doing more income-generating activities.

Table 7: Principal occupation of the affected population in percentage

Occupation	Male	Female	Total
Agriculture	6.48		3.54
Business	43.86	0.69	24.3
Day Labor	1.02		0.56
Expatriate	0.34		0.19

Dependency

Among the affected people, only 33.56% are earning members, and the remaining 66.43% are dependent members of the HHs. Taking into consideration the total affected population, one wage earner must support 1.98 dependents. The survey identified only a few women are engaged in the income-earning groups. Resulting, they are to some extent dependent on males.

Table 8: Income-earning and dependent member in the affected HHs.

Source: Census and IOL survey, June to July 2022

Poverty and Gender Dynamics

Overview

The census & socioeconomic survey revealed that few women are engaged in income-generating activities including some allied activities in the household. Housewife is the main occupation in the case of married capable women. The adult female members (unmarried) also take part in the household chores. Since then, it was found during the survey that male household members remain reluctant to have adult female household members engage in outside work and services. However vulnerable poor women are already doing work outside the home either as laborers or small shopkeepers/vendors.

Sexual exploitation and abuse (SEA) and sexual harassment (SH) related risks were also raised by the stakeholders during the consultation meetings and the participants discussed about potential risks and mitigation measures of SEA-SH. The consultants disclosed that GRM at each level will be available to receive, record, and investigate all SEA-SH-related complaints. After the case is investigated and disciplinary action is taken, the case may be handed over to a service provider. The RAP implementing agency will assist the Project Director in identifying service provider organizations in the project area. The GRM will document whether the complaint is project-induced or not. If the complaint is related to the project, the GRM will track the complaint and keep updates through monthly progress reports. If not, the GRM will not track the complaint.

During construction, LGED will ensure that contractors will try to engage local workers as much as possible to avoid labor influx. During labor recruitment, poor women need to be

encouraged to work and equal pay for similar work must be ensured. At consultations, people expressed concerns over the influx of migrant workers for the project's construction work and their possible engagement in illicit sexual relationships with women and children. They thought that such instances can cause the spread of sexually transmitted diseases. Addressing this concern, both LGED and the contractors will ensure that awareness-raising programs on GBV and sexually transmitted diseases are conducted for all local and migrant workers as well as local communities prior to the commencement of civil works. Furthermore, it will be also a mandatory requirement on the part of contractors to enforce a strict code of conduct for their labor teams. To ensure all these, the contractor's bid documents will ensure the inclusion of the above-mentioned items.

Vulnerable Groups

Vulnerable households have been defined as (i) headed by a single woman or woman with dependents and low incomes; (ii) headed by elderly/disabled people without means of support; (iii) households that are below the latest nationally defined poverty line; (iv) households of the indigenous population or ethnic minority; and (v) households of low social group or caste. During the elaboration of the RAP no indigenous population, ethnic minority, or affected person of low social group or caste were identified.

Among the total affected population, 93 is found as vulnerable. Of the total vulnerable people, 85 is living under the poverty line, 7 people with disabilities and 5 female headed household

Table 9: Type of Vulnerable Household

Type	No.

Existing Utilities /Civic Facilities

It is known that the project is in rural areas in the western and southern regions of the country. There is only an electricity supply facility available in the affected growth centers. Residential and commercial entities, CPRs, and offices /institutions have such utilities/civic facilities in the project area. Such facilities may be disconnected temporarily due to the project and will be further connected by the PAPs.

Source of Drinking Water

The survey revealed that 98.40% affected households collect drinking water from hand tube wells and other 1.60% use water from Shallow Tube Well. There is no water supply connection to household and commercial structures so no compensation should be paid for the reconnection/ reinstallation charge. LGED will further verify the existing alternative facilities once again before the finalization of the indent.

Table 10: Sources of drinking water at household level

Type of Toilet

Hygienic sanitation in Bangladesh particularly in urban/semiurban settings is well-practiced. The survey revealed that more than 84% of the affected HHs use sanitary toilets while 7.55% use Semi pucca toilets. Only 8.01% HHs use Katcha (slab) toilet or use others toilets since they have no facility in their houses.

Table 11: Use of Toilets

	Sanitary	Semi Pucca	Katcha Slab	
Total	369	33	35	437
%	84.44	7.55	8.01	100.00

Source: Census and IOL survey, June to July 2022

Source of Cooking

It is revealed that about 14.19 % of affected HHs use Gas (cylinder) in their house for cooking and about 83.02% use firewood and very few (2.75%) use the electric cooker for cooking. It is to be noted here that there is no pipe supply gas connection, so no one will be entitled to a Gas reconnection charge from the project.

Table 12: Source of Cooking

Source of Light

The project locations are in rural settings where 100% of the affected people enjoy electricity. It is to be noted that all the affected CPRs/Offices/Institutions have electricity supply to their premises. Displaced entities including residential, commercial, and CPRs have electric supply in their premises within the project footprint.\

Annex 8: Entitlement Matrix

Introduction

The involuntary taking of land results in relocation or loss of shelter; and loss of assets or access to assets or loss of income sources or means of livelihood, whether or not the PAPs must move to another location. Meaningful consultations with the affected persons, local authorities and community leaders will therefore allow for establishment of criteria by which displaced persons will be deemed eligible for compensation and other resettlement assistance. Affected persons will be classified as:

- i. Persons who have formal legal rights to land or assets
- ii. Persons who do not have formal legal rights to land or assets, but have a claim to land or assets that is recognized or recognizable under national law; or
- iii. Persons who have no recognizable legal right or claim to the land or assets they occupy or use.

Those covered under (a) and (b) above are to be provided compensation for the land they lose, and other assistance in accordance with this RAP. Persons covered under (c) above are to be provided with resettlement assistance in lieu of compensation for the land they occupy, and other assistance, as necessary, to achieve the objectives set out in this RAP, if they occupy the project area prior to a cut-off date established by the project authorities in close consultation with the potential PAPs, local community leaders and the respective local authorities and acceptable to the World Bank.

Persons who encroach on the area after the cut-off date are not entitled to compensation or any other form of resettlement assistance. All persons included in (a), (b) or (c) above are to be provided with compensation for loss of assets other than land. It is therefore clear that all project affected persons irrespective of their status or whether they have formal titles, legal rights or not, squatters or otherwise encroaching illegally on land, are eligible for assistance if they occupied the land or had use of it, before the entitlement cut-off date.

Methods to Determine Cut-Off Date

Cut-off date is the date after which eligibility for compensation or resettlement assistance will not be considered. It will be established to identify the non-land assets that will qualify for compensation and discourage abuse of the mitigation policies by defrauding the project. Date of service of notice under Section 4 of Land Acquisition and Requisition of Property Act (ARIPA 2017) is considered as legal cut-off dates for the landowners. The 1st day of the census survey to be the cut-off date for the squatters and encroachers and recognized as social cut off dates.

Eligibility Criteria

The RAP stipulates eligibility and provisions for compensating all types of losses (land, crops/trees, structures, business/employment, and workdays/wages). All PAPs including non-titled or informal dwellers will be compensated for lost assets (crops, structures, trees and/or business losses) and will receive (i) compensation (as required, to match replacement value), and/or (ii) replacement land, structures, seedlings, other resettlement assistance such as shifting allowance, assistance with rebuilding structures, compensation for loss of workdays/income.

The PAPs who are entitled to compensation under the Project include:

- Persons whose structures are in part, or in total, affected temporarily or permanently by the Project.
- Persons whose residential or commercial premises and/or agricultural land (or other productive land) is in part, or in total, affected (permanently or temporarily) by the Project.
- Persons whose businesses are affected in part, or in total, (temporarily or permanently) by the Project.
- Persons whose employment or hired labor or share-cropping agreement is affected, temporarily or permanently, by the Project.
- Persons whose crops (annual and perennial) and/or trees are affected in part, or in total, by the Project.
- Persons whose access to community resources or property is affected in part, or in total, by the Project.

Impacts of the subgroup have been identified following the above criteria. The result shows that, there is no titled household will be affected by this sub project. Total of entitles affected at GCM under this subgroup by losing of commercial structures out of which 437 squatters, 7 market somity structure and ten structures owned by Upazila Parishad. Due to the impact on the commercial structures, 486 shops will require to be dismantled and accordingly 486 business operators will be affected by losing their business. Moreover, The Inventory of Loses (IOL) survey also identified that 58 wage labor and 201 tenants will be affected in the affected shops by the project intervention. Total 93 of affected people is identified as vulnerable considering their income level. Of the total affected HHs, 1609 PAPs have been identified and will be affected by the project intervention but none of them will be physically displaced since their residential premises are not affected.

Compensation eligibility will be limited by a cut-off date to be set for each subproject and PAPs who settle in the affected areas after the cut-off date will not be eligible for compensation. They, however, will be given sufficient advance notice, requested to vacate premises and dismantle affected structures prior to project implementation. Their dismantled structures will not be confiscated, and they will not pay any fine or sanction.

Entitlements Matrix: Eligible PAPs, Assets and Compensation Guidelines

Table 14: Eligibility and Entitlement Matrix

Unit of Entitlement	Entitlements	Application Guidelines	Implementation Issues
Impact category 1: Acquisition of agricultural, homestead, commercial, water bodies (ponds) land			
Legal owner(s) as identified by Deputy Commissioner (DC) in the process of CCL payment.	<ul style="list-style-type: none"> • Cash compensation under law (CCL) which includes 200% premium • Replacement Value (RV) and dislocation Allowance as recommended by PAVC. • If RV is higher than CCL, the difference will be paid by LGED. • If the remaining land is unusable, the compensation provided will be calculated based on the total land affected (i.e., the actual land lost plus the remaining unusable land). 	<ul style="list-style-type: none"> • Land on the Project right of way to be acquired by DC. • Top up for RV will be recommended by PVAC • DC will pay CCL for land • If RV is higher than CCL the difference amount will be paid by LGED 	<ul style="list-style-type: none"> • Persons entitled will be informed of the details about the land acquisition and compensation process, resettlement package and payment procedure. • PVAC will recommend RV for land based on current market price (CMP) • DC will determine the market price of land average last 12 months sale price (from the date of service of notice under section 4. For all private land, the market price enhanced by 200% for CCL. For khas land, CCL will be assessed at the market price without 200% enhancement. • Title updating for usufruct and other rights will be done before issuance of notice under section 4.
Impact category 2: Requisition of agricultural, homestead, commercial, water bodies (ponds) land			
Legal owner(s) as identified by Deputy Commissioner (DC) in the process of CCL payment.	<ul style="list-style-type: none"> • Rental price of land as determined by DC with consultation with the land owners and LGED following the guideline of ARIPA 2017 • Replacement Value (RV) and 	<ul style="list-style-type: none"> • Land on the Project right of way to be requisition by DC. • Top up for RV will be recommended by PVAC • DC will pay CCL for land 	<ul style="list-style-type: none"> • Persons entitled will be informed of the details about the land acquisition and compensation process, resettlement package and payment

Unit of Entitlement	Entitlements	Application Guidelines	Implementation Issues
	<p>dislocation Allowance as recommended by PVAC, if any assets other than the land is affected and required relocation.</p> <ul style="list-style-type: none"> • If the land or assets are leased to third party, compensation to the third party and income loss to the owners will be paid as recommended by DC • If the remaining land is unusable, the compensation provided will be calculated based on the total land requisitioned (i.e., the actual land required plus the remaining unusable land). • Requisition can be maximum of 2 years • Land has to be returned to the owner as original condition, otherwise compensation has to be paid as decided by DC and landowner. 	<ul style="list-style-type: none"> • If RV is higher than CCL the difference amount will be paid by LGED 	<p>procedure.</p> <ul style="list-style-type: none"> • PVAC will recommend RV for land based on current market price (CMP) • DC will determine the price of requisition value for land enhancement. • Title updating for usufruct and other rights will be done before issuance of notice under section 4. • Land will be returned to its owners as it was preferably better condition.
Impact category 3: Loss of residential, commercial structures with title to land			
Legal owner(s) as identified by DC in the process of CCL payment.	<ul style="list-style-type: none"> • Cash compensation under law (CCL) which includes 100% premium or RV whichever is higher • If RV is higher than CCL, the difference will be paid by LGED as top-up. • Transfer Grant at actual cost which will include labor cost and 	<ul style="list-style-type: none"> • Applicable to all structures standing on the right of way (RoW) at the time of issuance of notice under section 4 • JVC will verify eligibility by reviewing records of compensation payment by DC with the assistance of ESSC 	<ul style="list-style-type: none"> • Deputy Commissioner will pay Cash compensation under law (CCL) for the structure • PVAC will recommend replacement value of structure. • If replacement value is higher than CCL, the difference will be paid by LGED with assistance of

<ul style="list-style-type: none"> ● Persons losing more than 10% of their income from all sources as identified by Census and verified by PVAC ● Squatters 	<ul style="list-style-type: none"> ● Income restoration grants for three months based on the average monthly income loss Skill training and credit support under income generation program. ● Special Assistance of a one-time 	<ul style="list-style-type: none"> ● The EPs will be identified as per census ● Income and livelihood support will be provided by the LGED. 	<ul style="list-style-type: none"> ● Vulnerable households losing income from employment for the transitional time up to permanent settlement will be assessed during census ● These persons will be covered

Unit of Entitlement	Entitlements	Application Guidelines	Implementation Issues
	payment for vulnerable household as each female-headed, disabled-headed, elderly-headed and poor household as decided by RAC and/or PIU • All the vendors and squatters will be eligible for Skill training and credit support under income generation program.		under the skill training program and the allowance will be paid upon performance.
Impact category 13: Unforeseen adverse impacts			
Households/persons affected by any unforeseen impact identified during RAP implementation	Entitlements will be determined as per the resettlement policy framework	• The unforeseen impacts will be identified through survey by LGED as per request from the impacted population • The entitlements will be approved by the Ministry of Local Government, Rural Development and Cooperatives.	• The unforeseen impacts will be identified with due care as per policy framework and proposed to the Ministry of Local Government, Rural Development and Cooperatives for approval including quantity of losses, their owners and the entitlement.
Impact Category 14: Construction induced impact			
Title and non-title land structure, tree and /or any type of assets owners	• RV of damaged land, structure, tree, crops/fish stock and /or any type of assets owners as determined by PVAC and affected land / asset owners • Owner will be allowed to take away all salvageable materials free of cost.	• The Contractor will bear the cost of any impact on structure or land due to movement of machinery and in connection with collection and transportation of burrow materials. • All temporary use of lands outside proposed project area will be through written agreement of the landowner and the contractor	• Compensation and other assistance to be paid before relocation. • Female headed households will get special assistance. • The Labourers in the camp would be trained about safety, STDS, HIV/AIDS, safe sex etc. The contractor shall ensure first aid box and other safety measures regarding such diseases.

Compensation Payment

In cases of acquisitions, a part of the compensation for lands and other affected assets built or grown there on will be assessed and paid to the title holding PAPs by the DC, the head of the Acquiring Body. If this payment Compensation Under Law-, (CUL), is found to be lower than the replacement costs of land/structure and market prices of trees/perennials, LGED will directly pay the difference as 'Top-up' to make up for the shortfall.

With and without acquisition, compensation/assistance to all other PAPs who are not covered by the Land Acquisition Act, (ARIPA 2017) but qualify according to this RAP, will also be directly paid by LGED.

Where an owner loses lands and other assets in more than one mauza or land administration unit, the person will be counted once, and his/her top-up will be paid as a single amount. The amount of top-up due to the affected person will be determined by comparing the total amount of CUL paid by the DCs for lands and other assets acquired in all mauzas with the total replacement costs and/or market prices thereof.

Where DC's CUL payment is not made together for all lands and other assets acquired from an owner due to legal disputes or other reasons, LGED will determine the top-up for the acquisitions as a whole but pay on the lands and other assets for which CUL has been paid. Top-up for the rest will be paid whenever the CUL payment is made after resolution of the disputes.

Compensations/entitlements due to the PAPs, including those who are not covered by the ARIPA 2017, but eligible according to this RAP, will be paid in full compensation before they are evicted from the acquired private and public lands.

The LGED will ensure that the properties to be acquired or displaced for the project will be compensated at their full replacement cost determined by the PAVC following the guideline of the RAP.

As part of the Detailed Measurement Survey of each project affected entity (an individual, household or community) completed by the DC or IA on behalf of the LGED, the entitlement matrix (EM) will then be used to offer compensation options to each project affected entity.

Annex 9: Legal Framework

Land Acquisition policy of Bangladesh Government

The Acquisition and Requisition of Immovable Property Act 2017 (ARIPA) is the principal legislation governing eminent domain for land acquisition and requisition in Bangladesh. ARIPA 2017 detailed the land acquisition process from section 4 to section 19 and land requisition process from section 20 to section 28. According to ARIPA 2017, compensation to be paid for affected land, structures, trees, crops and any other damages caused by such acquisition. Under the ARIPA 2017, The Deputy Commissioner (DC) determines the value of the acquired assets as at the date of issuing the notice of acquisition under section 4(1). The DCs there after enhancing the assessed value by 200% as premium for land and 100% for loss of standing crops, structures and trees due to compulsory nature of the acquisition. The compensation such determined is called the Cash Compensation under Law (CCL). If the land acquired has standing crops cultivated by a tenant (Bargadar) under a legally constituted written agreement, the law requires that compensation money be paid in cash to the tenants as per the agreement. ARIPA 2017 under section 4 (13) permits the acquisition of the community properties if it is for a public purpose provided that project for which the land is acquired provides for similar types of assets in some other appropriate place or reconstruct the community properties.

Households and assets moved from land already acquired in the past for project purposes and/or government khas land are not included in the acquisition proposal and therefore excluded for considerations for compensation under the law. Lands acquired for a particular public purpose cannot be used for any other purpose. Furthermore, the Act under its section 15 provides for the acquisition of entire houses/buildings if their owners request to acquire the entire house or building against partial acquisition. The government is obliged to pay compensation for the assets acquired.

Table 15: Land Acquisition Process under ARIPA, 2017

Relevant Section	Steps in the proces Responsibility under ARIPA, 2017	
Section 4(1)	Publication of preliminary notice of acquisition of property for a public purpose	Deputy Commissioner
Section 4 (3) (1) (i)	Prior to the publication of section 4(1) notice. Identify the present status of the land, structures and trees through videography, still pictures or appropriate technology.	Deputy Commissioner
Section 4 (3) (1) (ii)	After the publication of the section 4(1) notice, a joint verification should be conducted with potentially affected households and relevant organizations.	Deputy Commissioner
Section 4 (7)	After publication of preliminary notice under the section 4(1), if any household has changed the status of the land for beneficial purposes, changed status will not be added to the joint verification notice.	Deputy Commissioner

Relevant Section	Steps in the proces Responsibility under ARIPA, 2017	
Section 4 (8)	If the affected person is not happy with the joint verification assessment, he/she can complain to Deputy Commissioner within 7 days of issuing sec 4(1) notice.	Affected Person
Section 4 (9)	Hearing by Deputy Commissioner within 15 working days after receiving the complaints. In case of government priority projects, hearing will be within 10 working days.	Deputy Commissioner
Section 5 (1)	Objections to acquisition by interested parties, within 15 days of the issue of section 4 (1) Notice	Affected Person
Section 5 (2)	Deputy Commissioner submits hearing report within 30 working days after the date of the sec 5(1) notice. In the case of government priority projects, it will be within 15 working days.	Deputy Commissioner
Section 5 (3)	DC submits his report to the (i) Government (for properties that exceed 16.50 acres; (ii) Divisional Commissioner for properties that do not exceed 50 standard bighas. Deputy Commissioner makes the final decision If no objections were raised within 30 days of inquiry. In case of government priority project, it will be 15 days	Deputy Commissioner
Section 6 (1) (1)	Government makes the final decision on acquisition within 60 working days after receiving report from the Deputy Commissioner under sec 5(3) notice.	Government
Section 6 (1) (2)	Divisional Commissioner makes the decision within 15 days or with reasons within 30 days since the submission of the report by Deputy Commissioner under sec 5(3) notice.	Divisional Commissioner
Section 7 (1)	Publication of the Notice of final decision to acquire the property and notifying the interested parties to submit their claims for compensation	Deputy Commissioner
Section 7 (2)	Interested parties submit their interests in the property and claims for compensation within 15 working days (in case of priority project 7 days).	Affected Person
Section 7 (3)	Individual notices have to be served to all interested persons including the shareholders within 15 days of issuing Section 7(1) notice	Deputy Commissioner
Section 8 (1)	Deputy Commissioner makes a valuation of the property to be acquired as at the date of issuing Section 4 Notice; determine the compensation; and apportionment of compensation among parties interested.	Deputy Commissioner
Section 8 (3)	DC informs the award of compensation to the interested parties and sends the estimate of compensation to the requiring agency/person within 7 days of making the compensation decision	Deputy Commissioner

Relevant Section	Steps in the proces Responsibility under ARIPA, 2017	
Section 8 (4)	The requiring agency/person deposits the estimated award of compensation with the Deputy Commissioner within 120 days of receiving the estimate.	Deputy Commissioner
Section 9 (1)	During valuation of assets, Deputy Commissioner will consider the following: (i) Average market price of land of the same category in the last 12 months; (ii) Impact on existing crops and trees; (iii) Impact on other remaining adjacent properties; (iv) Impact on properties and income; and (v) Relocation cost for businesses, residential dwellings etc.	Deputy Commissioner
Section 9 (2)	Additional 200 compensations on current mouza rate is added to the estimated value. If private organizations acquire, added compensation will be 300.	Deputy Commissioner
Section 9 (3)	Additional 100 compensations on top of the current market price for impacts mentioned under sec 9(1) and (2)	Deputy Commissioner
Section 9 (4)	Appropriate action should be taken for relocation on top of the above-mentioned sub-sections.	
Section 10 (2)	If an entitled person does not consent to receive compensation, or if there is no competent person to receive compensation, or in the case of any dispute with the title to receive compensation, Deputy Commissioner deposits the compensation amount in a deposit account in the Public Account of the Republic and Deputy Commissioner acquires the land. But if any person complains about the ownership of the land, with appeal, he/she will be able to collect the amount from Deputy Commissioner. There is no Fixed time for this.	Deputy Commissioner
Section 11 (1)	Deputy Commissioner awards the compensation to entitled parties within 60 days of receiving the deposit from the requiring agency/person.	Deputy Commissioner
Section 12	When the property acquired contains standing crops cultivated by bargadar (shareholders), such portion of the compensation will be determined by the Deputy Commissioner and will be paid to the bargadar in cash.	Deputy Commissioner

According to the initial field screening, no tribal people are expected to be affected by the project. However, if tribal people are identified during project implementation, a separate IPP plan will be prepared following the guidelines of ESS7 and thus detailed legal framework will be described.

Voluntary Land Donation (VLD)

There are no specific guidelines on voluntary land donation in ARIPA 2017. The project will discourage land donation. However, during stakeholder consultations, the local people

expressed that they normally donate the land for construction of rural roads. If local people are interested to donate land voluntarily, voluntary land donation procedures and steps described in ESS-5 must be followed. If donated land is used in this program, LGED must demonstrate that:

- The potential donor or donors have been appropriately informed and consulted about the project and the choices available to them.
- Potential donors are aware that refusal is an option and have confirmed in writing their willingness to proceed with the donation.
- The amount of land being donated is less than 10 of the potential donor's land holding and that it would not have significant impact on their livelihood
- No household relocation is involved.
- The donor is expected to benefit directly from the project; and
- For community or collective land, donation can only occur with the consent of individuals using or occupying the land. LGED will maintain a transparent record of all consultations and agreements reached.
- All consultations and documentation procedures regarding the donation must be well documented and preserved.

The World Bank Environment and Social Standards

Since October 2018, all World Bank Funded Investment Project Financing (IPF) are required to follow the Environmental and Social Framework (ESF) consisting of ten (10) Environment and Social Standards (ESS). These ESSs set out their requirement for the borrowers relating to the identification and assessment of environmental and social risks and impacts associated with any project. The ESSs support the borrowers in achieving good international practice relating to environmental and social sustainability, assist them in fulfilling their national and international environmental and social obligations, enhance transparency and accountability and ensure sustainable development outcome through ongoing stakeholder engagement. Among the 10 standards, ESS5 on Land Acquisition, Restrictions on Land Use and Involuntary Resettlement recognizes that project-related land acquisition and restrictions on land use can have adverse impacts on communities and persons. LGED has prepared this RAP following the guidelines suggested under ESS5.

Objectives of ESS 5

- To avoid involuntary resettlement or, when unavoidable, minimize involuntary resettlement by exploring project design alternatives.
- To avoid forced eviction.
- To mitigate unavoidable adverse social and economic impacts from land acquisition or restrictions on land use by: (a) providing timely compensation for loss of assets at replacement cost and (b) assisting displaced persons in their efforts to improve, or at least restore, their livelihoods and living standards, in real terms, to pre-displacement levels or to levels prevailing prior to the beginning of project implementation, whichever is higher.
- To improve living conditions of poor or vulnerable persons who are physically displaced, through provision of adequate housing, access to services and

facilities, and security of tenure.

- To conceive and execute resettlement activities as sustainable development programs, providing sufficient investment resources to enable displaced persons to benefit directly from the project, as the nature of the project may warrant.
- To ensure that resettlement activities are planned and implemented with appropriate disclosure of information, meaningful consultation, and the informed participation of those affected.

Applicability of ESS 5

ESS5 will apply as the direct social and economic impacts of a project that are permanent or temporary and are caused by the involuntary taking of land resulting in (i) relocation or loss of shelter; (ii) loss of assets or access to assets; (iii) loss of income sources or means of livelihood, whether or not the affected persons must move to another location; or (iv) the involuntary restriction of access to legally designated parks and protected areas resulting in adverse impacts on the livelihoods of the displaced persons. The ESS5 also applies in case any subproject activities found as ‘linked’ or ‘associated facility’. This ESS requirements and provisions apply to all components of LGED that result in involuntary resettlement, regardless of the source of financing. Non-applicability of ESS5 is attached with Annex 5. This ESS applies to permanent or temporary physical and economic displacement resulting from the following types of land acquisition or restrictions on land use undertaken or imposed in connection with project implementation:

- (a) Land rights or land use rights acquired or restricted through expropriation or other compulsory procedures in accordance with national law.
- (b) Land rights or land use rights acquired or restricted through negotiated settlements with property owners or those with legal rights to the land, if failure to reach settlement would have resulted in expropriation or other compulsory procedures.
- (c) Restrictions on land use and access to natural resources that cause a community or groups within a community to lose access to resource usage where they have traditional or customary tenure, or recognizable usage rights. This may include situations where legally designated protected areas, forests, biodiversity areas or buffer zones are established in connection with the project.
- (d) Relocation of people without formal, traditional, or recognizable usage rights, who are occupying or utilizing land prior to a project specific cut-off date.
- (e) Displacement of people as a result of project impacts that render their land unusable or inaccessible.
- (f) Restriction on access to land or use of other resources including communal property and natural resources such as marine and aquatic resources, timber and non-timber forest products, fresh water, medicinal plants, hunting and gathering grounds and grazing and cropping areas.
- (g) Land rights or claims to land, or resources relinquished by individuals or communities without full payment of compensation; and
- (h) Land acquisition or land use restrictions occurring prior to the project, but which

were undertaken or initiated in anticipation of, or in preparation for, the project.

Forced eviction: LGED will not resort to forced evictions of affected persons. The exercise of eminent domain, compulsory acquisition or similar powers by DC will not be considered to be forced eviction providing it complies with the requirements of ARIPA 2017 and the provisions of this ESS and is conducted in a manner consistent with basic principles of due process. Due process is including the following types of procedural protections:

- consultation with all affected household.
- adequate and reasonable notice for all affected persons prior to the scheduled date of eviction.
- information on the proposed evictions.
- where groups of people are involved, impartial observers will be presented during eviction.
- all persons carrying out the eviction will be properly identified.
- evictions are not to take place in inclement weather or at night, or during festivals or holidays unless the affected persons consent otherwise.
- provision of legal remedies; and
- Provision, where possible, of legal aid to persons who need it to seek redress from the court.

Gaps Between ESS5 and ARIPA 2017 and Gap Filling Measures

The following are the key gaps of the ARIPA, 2017 vis-a-vis the World Bank ESS5 are presented in Table below

Table 16: Gaps between GOB policies/act and ESS5

Sl. Gaps between WB ESS 5 and GOB ARIPA Gap-filling measures/actions taken in this Project No 2017		
1	Gaps with regard to avoidance and minimized project impacts	The project designs adopted aimed to minimize impacts and adjusted tracks and station design further to reduce impacts and risk.
2	ARIPA 2017 does not require the preparation of resettlement plan or resettlement action plan (RAP);	RAP/s will be prepared for all sub-projects interventions and without the approval of RAP/s by the bank, construction works will not be started.
3	ARIPA 2017 recognize title owners only; informal settlers are not covered. DC declare cut-off date only for titleholders	All affected persons including titled, non-titled, encroachers will be identified for the compensation and assistance at full replacement cost Cut-off date for non-title holder will be consider the date of census survey.
4	Existing acts and methods of assessments do not ensure full replacement costs and transitional support	If the compensation according to the ARIPA 2017 do not meet the replacement cost, additional top-up payments will ensure replacement cost at current market price together with transitional support

Sl. Gaps between WB ESS 5 and GOB ARIPA Gap-filling measures/actions taken in this Project No 2017		
5	Consultation with affected communities not legally required under ARIPA 2017	Extensive consultations will be carried out during all phases of the project. A separate SEP will be prepared.
6	The affected landowners can object to the acquisition in the beginning, but once hearing is done and settled, there is no scope of further complaint during the acquisition process.	There is a provision of four-tier grievance redress mechanism in the project. 1 st level GRC is local GRC (LGRC), 2 nd level is district GRC, 3 rd level is PIU level and final are PSC level. People will first approach to LGRC and will request to forward case to district GRC if not settled at LGRC. If required, GRC will be forwarded to 3 rd and 4 th Aggrieved person may go to court at any level of grievance mechanism for verdict.
7	Relocation assistance or support allowed for title holders only under ARIPA 2017.No support is allowed for the squatters/illegal occupants	Affected households and businesses will receive relocation assistance and support from the project irrespective of titled, non-titled, encroachers etc.
8	Income and livelihood restoration assistance is restricted only to additional 100 compensation	The project benefits include income and livelihood restoration, including training for alternative incomes, and seed grants for small businesses. Vulnerable people will be also included livelihood restoration program
9	There is no policy against land restriction and force eviction	Forced eviction and land restriction are not allowed in this project. However, the exercise of eminent domain, compulsory acquisition or similar powers by DC will not be forced eviction providing it complies with the requirements of ARIPA 2017 and the provisions of this ESS, and is conducted in a manner consistent with basic principles of due process
10	ARIPA 2017 do not consider / recognize impacts imposed by the associate facilities. The act even does not explicitly cover restriction of access as an impact that would require compensation or resettlement	A common approach will be taken, and impact and risk assessment will be conducted for the associated facilities as well. Impact and risk assessment will be also conducted for any kind of “restriction of access” by the project.
11	ARIPA 2017 does not have any provision to give special attention to the vulnerable groups like women, disables, ultra-poor or disadvantaged group	Special attention will be taken by the project for the vulnerable groups for i.e., additional grant, livelihood training, job opportunities during construction etc.
12	There is no provision for voluntary land donation	ESS5 clearly describes voluntary land donation procedures.

LGED will ensure implementation of the followings for different interventions:

Project design: LGED will try to avoid involuntary land acquisition, voluntary land donation or restrictions on land use. For this purpose, LGED will consider feasible alternative project designs to avoid or minimize land acquisition or restrictions on land use, especially where this would result in physical or economic displacement. The overall principle will be to balance the environmental, social, and financial costs and benefits, while paying particular attention to impacts on the women, poor and vulnerable.

Compensation and benefits for affected persons: All lands proposed to be acquired, requisitioned, affected structures, trees, business, community property and crops under the LGED program will be compensated as per replacement cost consistent with both government ARIPA 2017 and ESS 5. When land acquisition or restrictions on land use (whether permanent or temporary) cannot be avoided, LGED will offer affected persons' compensation at replacement cost, and other assistance as may be necessary to help them improve or at least restore their standards of living or livelihoods to the pre-project level. Compensation standards for categories of land and fixed assets will be disclosed and applied consistently. Compensation rates may be subject to upward adjustment where negotiation strategies are employed. In all cases, a clear basis for calculation of compensation will be documented, and compensation distributed in accordance with transparent procedures.

Public services and facilities: Public services and facilities interrupted and/ or relocated due to relocation will be fully restored and re-established at their original location or a relocation site. All compensation, relocation, restoration and rehabilitation provisions of this RAP are applicable to public services and facilities. These include but are not limited to schools, health centers, parks, community centers, local government administration, water supply, shrine and graveyards. However, for graveyard, the consent of the religious persons, local persons as well and local administration will be sought to mitigate the impact. Impacts on religious sites will be avoided as much as possible.

Vulnerable PAPs: All vulnerable PAPs including female headed, disabled-headed, elderly-headed and poor household etc. are entitled to livelihood restoration/ improvement support in the form of cash, job-placement, and additional financial support in the form of grants for investments in business or re-employment related equipment and buildings, as well as organizational and logistical support to establish the PAP in an alternative income generation activity.

Small ethnic communities: During initial screening and consultation, no small ethnic communities are identified in the potential project areas. However, LGED will conduct social surveys including census and if any household belonging to small ethnic communities are found affected, ESS7 will apply. ESS7 will be implemented through development of a detailed IPP with the provision of free, prior and informed consent as appropriate. Even, if tribal people are affected with the associate facilities detailed IPP will be also prepared.

Affected Women and Female headed households : To ensure a clear understanding and due consideration of specific relocation and/ or resettlement impacts on displaced women and to

safeguard their livelihoods, specific provisions for women will be adopted for the resettlement process, including (i) enumeration of all women and, if applicable, of their status as heads of household or otherwise vulnerable persons; (ii) collection of gender disaggregated socio-economic data; (iii) consultation of women in joint or separate meetings; (iv) due consideration of grievances lodged by women; and (iv) provision of compensation and/ or new titles to women if they are titled or recognized owners of lost assets, and provisions of restoration and rehabilitation measures to women, if households are female headed or women's livelihood is directly concerned. The RAP for relevant activities will detail the scope of impacts on women and where required gender action plans will be prepared, implemented and monitored within or outside RAPs.

Community engagement: LGED will engage with affected communities through the process of stakeholder engagement described in ESS10 on Stakeholder Engagement and Information Disclosure. Decision-making processes related to resettlement and livelihood restoration will include options and alternatives from which affected persons may choose. Disclosure of relevant information and meaningful participation of affected communities and persons will take place during the consideration of alternative project designs, and thereafter throughout the planning, implementation, monitoring, and evaluation of the compensation process, livelihood restoration activities, and relocation process.

Grievance mechanism: The LGED will ensure that a grievance mechanism for the project is in place, in accordance with ESS10 as early as possible in project development to address specific concerns about compensation, relocation or livelihood restoration measures raised by displaced persons (or others) in a timely fashion. A separate GRM for the management of SEA-SH and labor will be formed with the guidelines of ESS 4 and ESS 10. Where possible, such grievance mechanisms will utilize existing formal or informal grievance mechanisms suitable for project purposes, supplemented as needed with project-specific arrangements designed to resolve disputes in an impartial manner.

Planning and implementation: Where land acquisition or restrictions on land use are unavoidable, LGED will, as part of the environmental and social assessment, conduct census, inventory of losses (IOL) and socio-economic survey (SES) to identify the persons who will be affected by the project, to establish an inventory of land and assets to be affected, to determine who will be eligible for compensation and assistance, and to discourage ineligible persons, such as opportunistic settlers, from claiming benefits. The social assessment will also address the claims of communities or groups who, for valid reasons, may not be present in the project area during the time of the census, such as seasonal resource users. In conjunction with the census, the LGED will establish a cutoff date for eligibility. Information regarding the cut-off date will be well documented and will be disseminated throughout the project area at regular intervals in written and (as appropriate) non-written forms and in relevant local languages. This will include posted warnings that persons settling in the project area after the cutoff date may be subject to removal.
